

STOP COVID-19.

Speed up Nevada's recovery.

PROTECT YOUR COMMUNITY. AND YOUR PRIVACY.

- COVID Trace is a free, easy-to-use mobile phone app that will help Nevadans slow the spread of the virus in our fight against COVID-19.
- By downloading and opting in to the app's Exposure Notification System, your phone will generate important contact information with alerts to warn you about possible virus exposure, without compromising your privacy!
- The app doesn't use GPS and can't share your location or information. The technology only works if you decide to opt-in. If you change your mind, you can turn it off at any time.

YOU CONTROL WHETHER YOU RECEIVE EXPOSURE NOTIFICATIONS. THE EXPOSURE NOTIFICATION SYSTEM DOESN'T TRACK YOUR LOCATION. NEITHER GOOGLE, APPLE NOR OTHER USERS CAN SEE YOUR IDENTITY. ONLY PUBLIC HEALTH AUTHORITIES HAVE ACCESS TO THE SYSTEM.

BY WORKING TOGETHER AND USING EVERY TOOL AT OUR DISPOSAL, WE CAN PROTECT OUR COMMUNITIES AND HELP FLATTEN THE CURVE.

DOWNLOAD THE FREE APP TODAY!

It's available at the Apple and Android app stores.
