STATUS OF FEDERAL REQUESTS

<p>Test Kits</p>	<ul style="list-style-type: none"> The State of Nevada has submitted 4 COVID-19 testing component requests. Nevada has received 1 shipment of COVID-19 testing components (reagent). Nevada has 3 pending requests for COVID-19 testing components and has been told by the federal government that these items are on an indefinite backlog. <p>***Test kits acquired by community organizations, hospitals, private labs and entities through purchase or donation cannot be tracked by the State of Nevada.</p>
<p>PPE (Personal Protective Equipment)</p>	<ul style="list-style-type: none"> Nevada has received the 3rd and final push of PPE from the Strategic National Stockpile (SNS). Nevada will distribute PPE based upon the Regional Distribution System and population-based proportion. <p>***The State of Nevada stockpile inventory of PPE has been distributed to the 3 Local Health Authorities (LHAs) and rural counties on a needs-based and population-based proportion based on the 2018 Census Bureau estimates. As new shipments are delivered from federal agencies, they will continue to be distributed throughout the State.</p>

STATE OF NEVADA COVID-19 UPDATES

[APRIL 1, 2020] Gov. Sisolak issued [Emergency Directive 012](#) which authorizes the Nevada Adjutant General, to order into active duty National Guard personnel he deems necessary to assist the state's response to the COVID-19 pandemic. Major General Ondra Berry will oversee the organization of the State's response efforts in conjunction with the Division of Emergency Management and the Department of Health and Human Services.

[APRIL 1, 2020] Gov. Sisolak issued [Emergency Directive 011](#), which waives licensing provisions for medical professionals who are currently in good standing in other states, providers of medical services whose licenses currently stand suspended for licensing fee delinquencies, or failure to meet the continuing medical education requirements.

[MARCH 31, 2020] Gov. Sisolak issued [Emergency Directive 010](#), which extends the Declaration of Emergency to April 30, 2020 and orders Nevadans to stay in their residences, unless designated an essential worker.

WHAT NEVADANS CAN DO TO HELP

BATTLE BORN MEDICAL CORPS

DURING THE COVID-19 EMERGENCY, CERTAIN MEDICAL LICENSING REQUIREMENTS ARE WAIVED TO ALLOW NEVADA TO ADD ADDITIONAL HEALTHCARE WORKERS INTO THE SYSTEM

SIGN UP AT servNV.org.

The waiver allows medical professionals who are trained and in a medical field, but are not currently licensed in Nevada are being asked to seek a waiver and sign up.

- Medical Doctors
- Physician Assistants
- Nurse Practitioners
- Advance Practice Registered Nurses
- Registered Nurses
- Licensed Practical Nurses
- Emergency Medical Technicians
- Advanced Emergency Medical Technicians
- Respiratory Care Practitioners
- Paramedics
- Pharmacists
- Pharmacy Technicians
- Medical Students
- Nursing Students
- Medical Laboratory Directors or Technicians
- Licensed or Certified Behavioral Health professionals

FACE COVERINGS HELP PREVENT SPREAD

While there is no consensus if masks can reduce individuals' risk for contracting COVID-19, it is well established that even improvised homemade face coverings can control and reduce the spread of the virus from infected individuals.

Since transmissions may occur prior to the development of symptoms, face coverings can serve as a source of control for an individual who may be infected, but there are no substitutes for handwashing and aggressive social distancing. For more information, visit NVHealthResponse.nv.gov.

[APRIL 1, 2020] As the COVID-19 pandemic continues to impact our health care systems, both nationally and right here in Nevada, it has become increasingly important to slow the spread. In response to this, the State's medical experts have weighed in to provide everyone with information on how to both protect ourselves and others with improvised masks.

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period. U.S. citizens who live abroad should avoid all international travel.

Many countries are experiencing COVID-19 outbreaks and implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and several cruise operators have suspended operations or cancelled trips.

If you choose to travel internationally, your travel plans may be severely disrupted, and you may be forced to remain outside of the United States for an indefinite timeframe.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
