**State Unemployment Website Update on 18<sup>th</sup> of April Successful; New Password Feature Offers Claimants Updated Option to Reset Online Password**

LAS VEGAS, NV - The Nevada Department of Employment, Training and Rehabilitation (DETR) announced a successful update of its unemployment insurance (UI) website (<http://ui.nv.gov>). The agency also added and launched a performance feature on the 18th that affords filers another option to reset their online password 24 hours a day, seven days a week.

In a collaborative effort with Arisant, one of its partners, DETR created a password recovery page. This page is tailored to help users that have an existing account in the system but have forgotten their password or password recovery questions. The password recovery screen is accessed after the filer enters their username on the "Claimant Login" screen. Filers simply click on a link and are then forwarded to the password recovery page. This new online feature is in addition to the existing password form located at <http://gov.nv.gov/Forms/Unemployment/>

"We recognize the password challenges filers are experiencing and have implemented this new password feature as part of our commitment to client access. This additional capability will allow users to reset their passwords quickly and easily without the direct assistance of UI staff," said DETR director, Dr. Tiffany Tyler- Garner.

To file for unemployment in the State of Nevada, filers can use the online application available 24/7 at <http://ui.nv.gov/css.html>. Claimants are highly encouraged to use the internet to file their UI claims and reserve the phone lines for individuals who are not able or do not have the necessary resources to file online. Online filing during non-peak hours, such as early mornings, at night or weekends is also highly recommended.
