UPDATED August 11, 2020
## Guest Guidelines

### Restrooms & Pools/Spas
- Maintain adequate hand washing supplies (running water, soap, paper towels, touchless trash cans).
- Provide hand sanitizer stations at staffed facilities.
- Do not utilize shared drinking fountains.
- Clean soiled surfaces with soap and water prior to disinfecting.
- Disinfect all high touch surfaces at least daily (e.g. entrance rails, door handles, switches, sinks, toilets, etc.).
- Maintain disinfectant, pH and cyanuric acid at required levels.
- Follow regulations for your jurisdiction.
- Limit access to lockers or locker rooms but maintain access to restrooms and showers.

### General
- Must adhere to 6-foot social distancing practices. This includes in and around bleachers for anyone not in the same family.
- Reduce capacity by 50% of the fire code.
- Must conduct daily symptom assessments (self-evaluation). Anyone experiencing symptoms must stay home.**
- Consider removing tables, chairs, or benches that encourage poolside gathering.
- Must keep 6 feet or more distance from swimming pool.
- Lounge chairs must be arranged to maintain social distancing of at least 6 feet between persons not from same household.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

### Mandatory*
- Capacity to be reduced to 50% of the fire code.
- Post informational signs regarding social distancing, a list of COVID-19 symptoms and what to do if symptomatic at the entrance to all facilities.
- Encourage minimum 6 feet between people by changing deck layout, placement of furniture, designation of pathways etc.
- Face coverings are required for employees.
- Guests are required to wear a mask whenever they are not swimming in the pool.
- Do not wear face coverings when in the water.
- Limit pool/spa capacity to ensure 6-feet distance can be maintained between people while in the aquatic venue.
- Lounge chairs must be arranged to maintain social distancing of at least 6 feet between persons not from same household.

### Recommended Best Practices*
- Guests are required to wear a mask when they are not swimming in the pool.
- Encourage patrons to bring their own drinking water.
- Develop schedules that encourage staggered use of the pool area to avoid overcrowding.
- Close pool area if social distancing cannot be supported.
- Consider requiring reservations.

### MANDATORY AS OF 6/26/2020:
- Face coverings are required except for when you are actively swimming or meet other exemptions under Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.  

*Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.
**Confirmed Cases**

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| • Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.  
• Contact the local health district about suspected cases or exposures. Employees should maintain the confidentiality of employee health information.  
• Shutdown any facility for deep cleaning and disinfection, if possible.  
• Use disinfectants outlined on [EPA List N](https://www.epa.gov/). | • Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.  
• Once testing is readily available, test all suspected infections or exposures.  
• Following testing, contact local health department to initiate appropriate care and tracing. |

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), [Nevada OSHA](https://www.complianceonline.com/), and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
Prepared by the Local Empowerment Advisory Panel (LEAP)

**Roadmap to Recovery for Nevada**

**Local and Public Pools and Aquatic Centers**

**Mandatory as of 6/26/2020:**
- Face coverings are required except when you are actively swimming or meet other exemptions under Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>General:</strong></td>
<td><strong>General Options:</strong></td>
</tr>
<tr>
<td>● Review and consult the <a href="https://www.cdc.gov">CDC guidance</a> for aquatic venues.</td>
<td>● Consult with the company or engineer that designed your pool or aquatic venue to decide which <a href="https://www.epa.gov">disinfectants approved by the EPA</a> are best for your site.</td>
</tr>
<tr>
<td>● Reduce capacity to 50% of the fire code.</td>
<td>● Increase the frequency of air filter replacement and HVAC cleaning for indoor pools and aquatic centers.</td>
</tr>
</tbody>
</table>

**Communicate Clearly:**
- Post information throughout the pool and surrounding areas to frequently remind swimmers and visitors to take steps to prevent the spread of COVID-19. These messages should include information about:
  - Staying home if you are sick or do not feel well.
  - Using social distancing and maintaining at least 6 feet or more between individuals in all areas of the pool and deck whenever possible.
  - No gathering in groups of different households.
  - Patrons should not stand, sit, or otherwise block walkways or any identified narrow passage area.
  - Face coverings MUST be worn when entering buildings or interacting with other people when outside of the water, practice good personal hygiene including washing hands often with soap and water for at least 20 seconds, using hand sanitizer, refraining from touching eyes, nose, and mouth with unwashed hands, coughing and sneezing into an elbow, etc.
  - **DO NOT** wear face coverings while in the water!
  - Maintain public restrooms and shower facilities to lower risk of spread of virus.
  - Limit access to lockers or locker rooms but maintain access to restrooms and showers.
  - Remove any casual seating.
  - Ensure there are functional toilets and restroom facilities.
  - Clean and disinfect public areas and restrooms every 4 hours using EPA-registered disinfectants, particularly on high-touch surfaces such as faucets, toilets, doorknobs and light switches.
  - Make sure supplies for handwashing, including soap and materials for drying hands are fully stocked every time the bathroom is cleaned.
  - If towels are provided, they are to be stored in covered, sanitized containers that are clearly delineated clean versus soiled. Appropriate temperatures are to be used when washing and drying towels to ensure sanitation (hot water for washing, ensure they are completely dried). Employees handling towels must wear gloves and face covering.
  - Restroom and shower facilities should limit the number of users at any one time based on the facility size current social distancing guidelines. These facilities should be cleaned/sanitized per CDC recommended protocol along with established restroom cleaning schedules.

**Maintain public restrooms and shower facilities to lower risk of spread of virus.**
- Post cleaning schedule at each location.
- Install touch-free entry points at restrooms and other facilities.
- Install touchless sensors on faucets, paper towel, and soap dispensers wherever possible.
- Install and stock toilet seat cover dispensers.
- Disable or block off lockers to discourage use.

**Communicate Clearly:**
- Develop regular communication with customers through a variety of channels (text, emails, social posts, flyers, etc.) to clearly communicate the steps your beach, pool and aquatic center is taking to protect users and stop the spread of COVID-19.
- Develop and update website, send emails to users with additional preventative steps the facility is taking, as well as communicate any changes users should expect to experience.
**Aquatic Facilities Operators cont.**

### Mandatory*

**Closures, modifications and limitations:**
- Install physical barriers (for example, lane lines in the water or chairs and tables on the deck) and visual cues (for example, tape on the decks, floors, or sidewalks) and signs to ensure that staff, patrons, and swimmers stay at least 6 feet apart from those they don't live with, both in and out of the water.
- Discourage or prohibit shared objects including goggles, nose clips, and snorkels.
- In accordance with current orders, close any non-essential areas where people could potentially congregate.
- Any food service must be run in accordance with current orders and guidelines for such establishments, found in Nevada.
- Develop and implement a reduced maximum capacity to allow 6-feet of distance between users. The formula for capacity should consider the available deck area as well as the pool surface area, as often one is greater than the other. If water surface area is smaller than deck area, an additional limit of swimmers/pool occupants should be implemented to ensure proper social distancing.
- Develop revised deck layouts in the standing and seating areas so individuals can remain at least 6 feet apart from others.

**Follow all appropriate guidance for customer interaction, retail sales, and equipment rentals.**
- Install barriers and protective shields where needed to safely distance staff and customers.
- Post a revised occupancy number in retail or rental areas in accordance with any current order to minimize crowding where necessary.
- Mark floors inside buildings for 6 feet standing areas or one-way traffic.
- Clean and disinfect high-use areas like door handles, keypads, counter tops, etc. after each use or at a minimum of every two hours.
- Disinfect all rental equipment after each use, using EPA-registered disinfectants.
- Arrange any seating areas, tables, chairs, etc. (indoors and out) at safe distances from each other. If safe distances are not achievable, or regular sanitizing of these areas is not possible, barricade or remove seating areas.
- Review and follow all guidance for retail operations in Nevada.

**Maintaining Distance in outdoor spaces**
- In areas of concern, mark 6-foot spaces on pool deck to help users visualize safe distancing.
- In areas with a lot of cross traffic, direct pedestrian traffic to enter/exit these locations in specific ways or indicate one-way traffic wherever possible.

**Employees and contractors:**
- Maintain at least 6 feet physical distance from other employees.
- Businesses must require all employees to wear facial coverings, except for one of the following reasons:
  - Facial coverings in the work setting are prohibited by law or regulation.
  - Facial coverings are in violation of documented industry standards.
  - Facial coverings are not advisable for health reasons.
  - Facial coverings are in violation of the business' documented safety policies.
  - Facial coverings are not required when the employee/volunteer works alone in an assigned work area.
  - There is a functional (practical) reason for an employee/volunteer not to wear a facial covering in the workplace.

**Recommended Best Practices*  

---

**Closures, modifications and limitations:**
- Facilities may NO LONGER determine if face covering are required to enter common spaces. They are NOW REQUIRED.
- Ensure adequate equipment for patrons and swimmers, such as kick boards and pool noodles, to minimize sharing to the extent possible, or limiting use of equipment by one group of users at a time and cleaning and disinfecting between use.
- Implement a reservation system or a time limit for visitors and swimmers to accommodate the reduction in pool capacity. Use online solutions for reservations, waivers, or payment, where possible.

**Follow all appropriate guidance for customer interaction, retail sales, and equipment rentals.**
- Regularly provide customers with up-to-date information about COVID-19 and related business procedures and policies. Communicate the importance of practicing preventive actions.
- Install touch-free entry points to buildings where possible.
- Create self-sanitizing stations by making hand sanitizer, soap, and water, or effective disinfectant available to the public at or near the entrance of facilities and at any locations where people have direct interactions and near high-touch surfaces.

**Employees and contractors:**
- 3rd-party delivery staff must wait outside or in non-congested areas practicing social distancing guidelines. 3rd-party delivery staff MUST wear face coverings.
- Educate on proper use, disposal, and maintenance of face coverings. Enhance education on proper use of gloves, per code.
- Health checks may include temperature assessments, questionnaires, employee self-checks, screening apps or other tools. Update files with log of “health checks”.
- Conduct telephone symptom assessment for employees who were ill and planning to return to work.
- As employee rehiring begins, consider virtual interviewing and on-boarding when possible.

---

*Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.*
### Aquatic Facilities Operators cont.

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Businesses must provide written justification, upon request, explaining why an employee is not required to wear a facial covering in the workplace. At minimum, facial coverings (masks) should be cloth/fabric and cover an individual’s nose, mouth, and chin.)</td>
<td>- Reinforce education per current food safety code about when to wash hands. Post health department handwashing posters at sinks and stations. Set times for periodic handwashing.</td>
</tr>
<tr>
<td>- Be as flexible as possible with staff attendance and sick-leave policies. Remind staff to stay at home if they are sick. Isolate and send home anyone who exhibits fever, cough, or shortness of breath.</td>
<td>- Avoid switching tasks when possible to reduce cross contamination concerns. Increase handwashing if changing tasks is necessary.</td>
</tr>
<tr>
<td>- Employees must perform daily symptom assessment, including assessing for symptoms and taking your temperature with a thermometer and monitoring for fever. Per the CDC, symptoms include cough, shortness of breath or difficulty breathing, fever, chills, repeated shaking with chills, muscle pain, headaches, sore throat and new loss of taste or smell.**</td>
<td>- Appoint an employee safety team or point of contact to identify safety concerns; suggest additional safety or sanitizing measures; and make ongoing improvements to your safety plan. Make sure all employees know who is on this team and how to contact them. This team can be responsible for training, developing, and distributing information regarding updated protocols, answering questions, and displaying information.</td>
</tr>
<tr>
<td>- Require employees to stay at home if symptomatic and perform daily symptom assessment requirements before returning to work.**</td>
<td>- Regularly provide staff with up-to-date information about COVID-19 and related business procedures and policies. Communicate the importance of practicing preventive actions.</td>
</tr>
<tr>
<td>- Company vehicles, equipment, break rooms, bathrooms, and other common areas must be cleaned and disinfected daily.</td>
<td></td>
</tr>
<tr>
<td>- Implement staggered employee entry, working in assigned teams, varied arrival and departure, and staggered breaks to avoid interaction or grouping among staff.</td>
<td></td>
</tr>
<tr>
<td>- Require regular handwashing.</td>

</tr>
</thead>
</table>
| ● Only operate at 50% capacity.  
● Conduct daily symptom assessments.**  
● Require employees to stay home if symptomatic.  
● Provide PPE for staff.  
● Instructors should wear face coverings to the extent practicable and whenever they are outside the water.  
● Continue to use ultraviolet purification and chlorine in swimming pools.  
● Alter seating layout in the viewing area to ensure social distancing. All people in the viewing area must wear face covering.  
● Those receiving lessons that are between 2 and 9 are encouraged to wear a face covering whenever they are not swimming in the pool.  
● Those receiving lessons that are over 10 years of age are required to wear a face covering whenever they are not swimming in the pool.  
● Remove all toys in playrooms and lobbies.  
● Require frequent and thorough hand washing. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.  
● Regularly disinfect all high touch surfaces inside facilities and shared equipment.  
● Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.)  
● Provide hand sanitizer stations.  
● Take temperatures of employees daily and/or ask screening questions for COVID-19.  
● Consider a disinfect fogging machine for the facility.  
● Install plexiglass shields at front desks.  
● Provide make-up swim lessons for children who are ill.  
● Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic. |
| ● Consider medical clearances for those students who have been diagnosed for COVID-19. |

**Customers/Students**
- Allow only 1 caretaker per student.  
- Customers and students must arrive no more than 5 minutes before the start of a class and stay no more than 5 minutes after the class is finished.  
- Students should arrive and leave wearing their swimsuit.  
- Students should bring their own towels and goggles if they need them. No towels or googles will be shared.  
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.  
- Once testing is readily available, test all suspected infections or exposures.  
- Following testing, contact local health department to initiate appropriate care and tracing. |

**Confirmed Cases**

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**
### Spectator Seating, High Traffic, & Congested Areas

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| ● Immediately isolate and seek medical care for any individual who develops symptoms while at work  
● Contact the local health district about suspected cases or exposures  
● Shutdown any facility for deep cleaning and disinfection, if possible.  
● Use disinfectants outlined on [EPA List N](https://www.epa.gov/cleanwater/epa-cleaning-products). | ● Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications  
● Once testing is readily available, test all suspected infections or exposures  
● Following testing, contact local health department to initiate appropriate care and tracing. |

### Signage

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| ● Post signage that displays all applicable federal, state and local regulations, requirements and orders, as well as WHO recommendations and CDC guidelines as they relate to mass gatherings and sporting events in effect at the facility.  
● Post signage identifying 6-foot social distancing for spectators waiting to enter the facility.  
● Post signage at all entrances to the facility which identifies the symptoms of COVID-19 and states the following:  
  ● To protect others from possible transmission of the virus, anyone who exhibits COVID-19 symptoms or has been in contact with someone who has tested positive for COVID-19 within the last two weeks, cannot enter the facility. These individuals are encouraged to contact their health care provider immediately for further medical advice and must obtain documented clearance from their health care provider before entering the facility. Participants must assume responsibility for themselves and their own staff. Posters with Symptoms of Coronavirus Disease are placed throughout the property.  
● Post signage throughout the facility which includes recommendations about good hygiene along with informing participants and others about ways to reduce the risk of COVID-19 transmission. Posters need to meet the CDC guidelines – Stop the Spread of Germs. | |

### Confirmed Cases

# Roadmap to Recovery for Nevada

## Summer Camps - Day and Residential

### MANDATORY AS OF 6/26/2020:
- For children 10 and over, face coverings are required except for persons meeting the exemptions established by [Directive 024](#) or unless the individual is participating in high-intensity activities.
- For children 2 to 9 years old, face coverings are recommended except when eating, drinking, swimming, or participating in high-intensity activities.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

</thead>
<tbody>
<tr>
<td>● Designate at least 1 qualified person from the medical or administrative staff who can act as the primary contact for campers, parents/legal guardians, and staff.</td>
<td>● Designate a team consisting of both medical and administrative staff responsible for answering questions and concerns from campers, parents/legal guardians, and staff.</td>
</tr>
<tr>
<td>● Prepare and distribute policy guidelines allowing staff to familiarize themselves with the material.</td>
<td>● Offer pre-screening before campers and staff head to camp. This will give insight into each individual’s health status prior to arrival.</td>
</tr>
<tr>
<td>● Prepare and distribute documentation to parents/legal guardians of campers to explain rules and guidelines for campers to follow during their time at camp.</td>
<td>● Inform relevant local public health authorities of planned camp operations schedule.</td>
</tr>
<tr>
<td>● Ascertain which staff members are at a higher risk for complications related to COVID-19. Work with camp administration and camp health staff to determine if these staff members should not work as counselors or have prolonged direct contact with campers. Identify alternative job duties for these staff members, if warranted.</td>
<td>● Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.</td>
</tr>
<tr>
<td>● Identify which campers are at higher risk for complications related to COVID-19 and encourage and support them in taking additional precautionary measures, including consultation with their healthcare provider.</td>
<td>● Maintain flexible leave policies for staff.</td>
</tr>
<tr>
<td>● Provide campers personal storage space for their personal belongings.</td>
<td>● Communicate strategies for administrative staff to telework from home if possible.</td>
</tr>
<tr>
<td>● Consult industry standards and best practices for the different areas and activities of summer camps. Stay up-to-date with the latest guidance from the CDC, state, and local health authorities.</td>
<td>● Consult industry best practices regarding HVAC systems. Make any necessary adjustments.</td>
</tr>
</tbody>
</table>

### Preparation
- Encourage social distancing (6 feet). Increase spacing and small groups. Limit mixing between groups to encourage social distancing.
- Provide PPE when it is applicable (e.g. food service, janitorial staff).
- Counselors should wear gloves when handling any incoming belongings or equipment prior to disinfection.
- Consider implementing staggered scheduling, arrival and drop-off, if feasible.
- Hold small group trainings and demonstrations on behaviors and precautions campers should abide by to prevent the spread of COVID-19.
- Employers must perform daily symptom assessment of employees.**

### During Camp
- Provide hand sanitizer stations.
- Take temperatures of employees daily and/or ask screening questions for COVID-19.
- Encourage employees to disinfect their equipment, if applicable, regularly.
- Create a staggered bathing schedule and limit the number of people using the facilities at one time.
- Create physical barriers between sleepers using curtains, sheets, etc.
- If possible, limit the amount of available media focused on the COVID-19 pandemic.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.
### During Camp

- Require employees and campers to stay home if symptomatic.
- Require frequent and thorough hand washing, including providing more areas for hand washing. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.
- Regularly disinfect all high touch surfaces.
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.). Establish a regular cleaning schedule.
- Do not use communal water fountains.
- Cabins should be cleaned routinely.
- Avoid sharing common bathroom supplies. Instruct campers to bring their own bathroom supplies and a container for toiletries.
- If possible, create at least 6 feet of space between beds. If utilizing head-to-toe orientation, 4 feet of space between beds is acceptable.
- Swimming pools and play areas should be properly cleaned and disinfected.
- Personal flotation devices should be cleaned and disinfected after each use.
- Consult industry standards and best practices for the different areas and activities of summer camps.
- Alert local health officials on unusually high camper absenteeism rates.
- Provide only honest and accurate information. Correct any false information that campers may have heard.
- If the decision to dismiss or end camp early is made, communicate those plans.
- Use disinfectants outlined on EPA List N.

### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information. Refer to the camp’s Communicable Disease Plan (CDP) or applicable childcare standards.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.

**Recommended Best Practices**

- Be aware of workers’ concerns about pay, leave, safety, health, and other issues related to COVID-19.
- Ensure all staff have been trained to correctly don, doff, maintain, and dispose of PPE and face masks.
- Regularly share camper absenteeism data with local health officials if requested.
- Keep parents/legal guardians up-to-date on COVID-19 as it relates to the camp. Send parents/legal guardians regular newsletters or communications regarding the prevention efforts. If necessary, report the number of suspected and confirmed cases (if any), as well as the camp’s responses.
- Keep up with CDC and health-based organizations information regarding COVID-19 in relation to waterfront activities and requirements.
- Designate certain equipment (e.g. lifejackets, craft supplies) to individuals for the duration of camp, to decrease the quantity of shared items.
- Require performing arts activities to be limited to the same groups and instructors for a given group.
- Assign seats to diners for the duration of camp.
- Discontinue use of condiment dispensers. Offer condiment packets or small containers.
- Discontinue the use of beverage dispensers.
- Consult industry standards and best practices for the different areas and activities of summer camps.

**Recommended Best Practice**

- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.
- Keep parents/legal guardians up-to-date on COVID-19 as it relates to the camp. Send parents/legal guardians regular newsletters or communications regarding the prevention efforts. If necessary, report the number of suspected and confirmed cases (if any), as well as the camp’s responses.
- If the decision to dismiss or end camp early is made, communicate those plans.
- Consult industry standards and best practices for the different areas and activities of summer camps.

---

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
On March 12, 2020, Governor Steve Sisolak issued the Declaration of Emergency for COVID-19 pursuant to the emergency powers conferred upon the Governor of Nevada by chapter 414 of NRS.

The purpose of these policies and procedures is to notify event operators of Nevada’s operational requirements to minimize the risk of exposure to COVID-19. During the state of emergency, certain events may be conducted without live spectators or guests for the purpose of broadcast or streaming. For purposes of these policies and procedures, the term “Event” means any live event that is traditionally held before an in-person audience. The term includes, without limitation, sporting events, concerts, entertainment shows, and non-sporting competitions.

These policies and procedures constitute the minimum requirements that should be followed by Event Operators. For purposes of these policies and procedures, the term “Event Operators” shall include, without limitation, the producer and sponsor of the event, any governing or sanctioning body with jurisdiction over the event or its participants, the owner and operator of the venue in which the event will be held, any third-party contractor involved in the presentation of the event, any other party involved in the presentation of the event, and any agent or employee of those entities or persons. These policies and procedures shall be adhered to under the combined effort of the Event Operators.

To hold an Event while these policies and procedures are in effect, an Event Operator shall submit an Operation Plan to the appropriate state or local authority with jurisdiction over the Event. The Operation Plan shall provide, in detail, the plans the Event Operators will follow to comply with the requirements of these policies and procedures. Such Operation Plan shall be submitted to the appropriate state or local authority at least [X] days prior to the planned date of the Event to allow for adequate review of the Operation Plan. An Event shall not take place unless the Operation Plan is approved by the appropriate state or local authority.

These policies and procedures are intended to serve as the general policy of the State of Nevada. An entity with jurisdiction over a particular Event or type of Event may implement and enforce equal or more stringent requirements.

These procedures and policies shall be effective until further notice.
Section I: Closed System Operations

A. Closed System

In addition to adherence to all Federal, state, and local regulations and guidelines concerning COVID-19 mitigation, including those promulgated under the Governor's March 12, 2020 Declaration of Emergency, Events may only proceed while utilizing a closed system of operations. The core principle of a closed system is to minimize the chance of transmission of COVID-19.

The term "closed system" should be construed to encompass the entire network of operations through which the Event is produced. It is not limited to the main event(s) being operated or performed for broadcast or streaming, but includes, without limitation, personnel management, all facilities utilized (e.g., event venue, lodging, staging areas, training/practice facilities, rest areas, etc.), and transportation.

Key components of a closed system include, but are not limited to, prohibiting the general public from having access, limiting access to specified personnel, controlled points of ingress/egress, policies and procedures for introducing personnel into the closed system, provision of medical testing, control and monitoring of the utilized facilities to ensure adherence to social distancing standards, organization and layout of event space to ensure social distancing standards, sanitation procedures, and policies and procedures to ensure limited compromise of the closed network in the event of a positive COVID-19 test.

Operation Plans should be written with the core goal of explaining the policies and procedures Event Operators are implementing to ensure a closed system for the duration of the event.

B. Facilities

Event Operators must ensure that the closed system is structured to account for all facilities being used in the production of the event. Operation Plans must provide details on all facilities being utilized, and relevant policies and procedures for maintaining integrity of the closed system across facilities. This includes, but is not limited to:

- Event Venue

Information on the venue where the main event intended for broadcasting/streaming is being hosted, and ancillary facilities (staging rooms, locker rooms, green rooms, production/media rooms, and other "back-of-house" facilities being used to facilitate production of the event).

- Lodging

Information on lodging/housing accommodations being utilized, including e.g. details on the number and distribution of personnel among housing.

- Training/Practice Facilities

Information on any facilities being utilized for training or practice. Event Operators should note whether equipment used at a training/practice facility (sporting equipment, musical instruments, etc.) will also be used in the main event and note how equipment will be moved about the closed system to ensure integrity of the system.

Operating Plans must include a floor plan or diagram of the event venue (and back-of-house facilities being used). Floor plans should include sufficient labeling and notation. This includes, without limitation, marking the placement of personnel to indicate adherence to social distancing, labeling of areas by function, marking points of ingress/egress to the closed system, and noting movement flow of personnel.

Floor plans of lodging and training/practices facilities are not required as part of the Operating Plan.
C. **Personnel**

An essential component of maintaining the integrity of a closed system is controlled access, movement, and function of ALL personnel involved in event operations. “Personnel” includes, without limitation, production staff, security personnel, cleaning staff, medical staff, event participants (athletes, performers), participants’ support staff, officiants, regulatory agents or other state or local government officials, and any other individuals introduced into the closed system.

Operation Plans must include details on personnel including, but not limited to, number of personnel, title/function of personnel to the production, responsibility for personnel (i.e., details on principal/agent relationship an individual is operating under--is the individual an agent of the venue operator, a professional sports sanctioning organization, event production company, etc.), details on any internal system being used to group/designate personnel and the privileges afforded to those groups (Example: what access to specific parts of the venue are granted to personnel falling within a certain group, expected interaction between personnel, etc.). Personnel should likewise be visually identifiable through a credential marker such as a badge or uniform.

Prior to entering the closed system, all personnel should be provided information on the importance of safe measures to mitigate the spread of virus infection utilizing recommendations from the CDC. Operation Plans should include a copy of the education being provided and details on how such information is being disseminated to personnel.

In recognition of [Governor Sisolak’s March 31, 2020 travel advisory for the State of Nevada](#), all personnel traveling into Nevada should limit, to the greatest extent possible, interaction with the Nevada public. Personnel should treat the closed system as a large-scale quarantine, and should make arrangements for the procurement of required goods and services from outside of the closed system that limits interaction with the Nevada public (example: delivery of goods rather than traveling to a retail location for pickup, or alternatively having designated personnel local to Nevada to handle pickup).

Maintaining social distancing is a key component to the closed system. However, the nature of some events, particularly contact sports, may involve prolonged interaction between personnel within 6 feet of one another. Operation Plans should note where such anticipated close-quarters interactions are anticipated to occur in the normal course of the event.

Facial coverings are required for all personnel.

D. **Sanitation of Closed System**

Operating Plans must provide an overview of sanitation procedures that will be implemented prior to, and through the course of, the event. Details should include procedures for sanitation of locations/facilities, equipment, and means of transportation. Plans must also detail sanitation procedures for parts of the closed system that present a higher risk of exposure to infection, specifically facilities and equipment where medical testing is performed and any facilities where personnel are quarantined while awaiting the results of testing. Sanitation procedures should also provide specific procedures for disposal of medical waste.

**Section II: Health & Safety**

A. **Closed System Screenings**

A key step in preventing compromise of the closed system is a controlled process for introduction of personnel into the system. Event Organizers should have detailed policies and procedures in place for admitting personnel, including, but not limited to, temperature screenings (maximum 100.4°F), a questionnaire assessing recent activity by the individual, COVID-19 testing, and intermediary quarantine between testing and results.

Information to be ascertained prior to entry into the closed system includes, but is not limited to:

- What, if any, travel has the individual made in the past 2-weeks, particularly to or from an area that is considered high risk or includes a government mandated quarantine.
- Whether the individual has come into contact with a person confirmed, or suspected to be, infected with COVID-19, and if so, when.
- Whether the individual, in the past two weeks, has experienced any symptoms associated with COVID-19, including:
  - Coughing
  - Shortness of breath or difficulty breathing
  - Fever
  - Chills
  - Muscle pain
  - Sore throat
  - New loss of taste of smell
  - Nausea
  - Vomiting
  - Diarrhea

Operating Plans should detail what personnel will be responsible for administering the questionnaire, including who will be assessing the answers and making a determination as to whether the questioned individual may enter the closed system. Questionnaires must be reviewed by a professional medical consultant.

B. COVID-19 Testing

All personnel must be subjected to both viral and antibody testing. Event Operators must provide for testing in a facility/setting that offers sufficient continuity into the closed system so as to minimize risk of personnel exposure between testing and entrance into the closed system. Event Operators should consult with appropriate health officials regarding test frequency--due to limitations on detecting COVID-19 very early in an infected individual through viral testing, Event Operators may need to conduct multiple rounds of viral testing dependent on the duration of the event. Event Operators should also be educated in the basics of COVID-19 testing as explained on the CDC's Testing information webpage, as well as the CDC's guidance on INTERPRETING COVID-19 TEST RESULTS. Testing should be overseen by a trained medical professional.

Viral testing--testing that is used to determine if an individual currently has a COVID-19 infection through samples from an individual's respiratory system--must be administered by nasal swab or saliva collection. Event Operators must coordinate for delivery and testing of samples to a laboratory conducting FDA testing or other viral testing resources provided by state health officials. Collecting and handling of viral tests should be done in accordance with CDC interim guidelines.

Antibody testing--testing that is used to determine if an individual has been previously infected with COVID-19 through blood analysis--must likewise be administered by a trained medical professional.

Operation Plans must detail policies and procedures for the administration of tests, including, without limitation, identifying medical personnel that will be responsible for administration of testing, agreements with state and local health officials regarding testing, and quarantining procedures for personnel while awaiting test results.

C. Positive Test Results

Any personnel testing positive for COVID-19 will be required to seek immediate primary care, and enter isolation in accordance with local, state, and CDC guidance. Event Operators must have policies and procedures in place, consistent with CDC guidance on Quarantine and Isolation, to provide resources for personnel traveling from out-of-state in the event they must enter isolation.

Any personnel that have had close contact with personnel testing positive for COVID-19 will be required to enter into quarantine for 14 days in accordance with local, state, and CDC recommendations on Quarantine measures. Event Operators must have policies and procedures in place, to provide resources for personnel traveling from out-of-state in the event they must enter quarantine. Such policies and procedures must be specified in the Operation Plan for the Event.

Operation Plans should detail the policies and procedures in place for personnel that must enter isolation or quarantine. These policies and procedures must include, at minimum, provision of housing for isolated/quarantined individuals, and a plan for administering healthcare treatment to infected individuals in consultation with healthcare experts.
D. **Contact Tracing**

Information must be held on file for all personnel sufficient to conduct contact tracing in the event of a positive test. Operation Plans must detail procedures for contact tracing, including, but not limited to, which personnel will be responsible for coordinating contact tracing operations with the state and local health authorities. Contact tracing must be conducted in accordance with CDC principles as outlined at [Contact Tracing: Part of a Multipronged Approach to Fight the COVID-19 Pandemic](https://www.cdc.gov/).  

E. **Social Distancing**

A core principle of operating an event in a closed system is facilitating an environment promoting social distancing by personnel. As identified by the [CDC](https://www.cdc.gov/), the key tenets of social distancing are maintaining a minimum distance of 6 feet between individuals, avoid gathering in groups, and avoid crowded places/mass gatherings.

Event Operators must consider all applicable Federal, state, and local social distancing guidelines, including those addressing limits on the size of public gatherings, across all aspects of the event, including, without limit, the stationing/placement of personnel (example: spacing of recording equipment, spacing of musicians in a concert, etc.), the movement and flow of personnel in performance of their duties, the grouping of personnel in staging and waiting areas, the transportation of personnel, the lodging or housing arrangements for personnel, and any extended one-on-one interactions between personnel (example: post-game interview of an athlete).

Operation Plans must detail policies and procedures that are designed, to the maximum extent reasonably possible, to adhere to social distancing.

F. **Personal Protective Equipment**

All personnel must utilize personal protective equipment (“PPE”) at all times during the Event. Operation Plans must detail who will be responsible for the procurement and distribution of PPE, what PPE will be utilized by personnel (at minimum, [Cloth Face Coverings](https://www.cdc.gov/)), and what education/instruction will be provided on the proper use of PPE. Cleaning staff must also wear gloves. State and local health authorities should also be consulted with regards to appropriate PPE for medical personnel, such as those conducting COVID-19 testing.

Due to the nature of some events, there may be periods where it is impractical for those participating to wear PPE. Operation Plans should note where such instances will be anticipated to occur in the normal course of the event.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
Prepared by the Local Empowerment Advisory Panel (LEAP)

Roadmap to Recovery for Nevada

Farmer’s Markets

**MANDATORY AS OF 6/26/2020:**

- Face coverings are required except for persons meeting the exemptions established by [Directive 024](#).
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

### Employees and Guests

**Mandatory***

- Screen all producers and employees for COVID-19 upon arrival to the market.
- Wash hands with soap and water for 20 seconds prior to starting their shift, after each customer and as necessary as hands become contaminated.
- Require all producers, vendors, and employees to wear face coverings. Gloves for food employees should only be used after an approved hand washing step.
- Disinfect all surfaces that are used for transactions: card readers, tabletops, and everything that may have been touched after each customer.
- Suspend all sampling of produce/food.
- Cancel all entertainment that will result in gathering of crowds of 10 or more people less than 6 feet apart.
- All produce must be pre-bagged.

**Recommended Best Practices***

- Take clients temperature. Anything over 100.4 degrees Fahrenheit, refuse service.
- Touchless payment methods (e.g. utilizing mobile phone payment).

### Shift Pattern

- Increase or decrease operating hours as necessary to avoid crowding and provide for 6 feet social distancing.
- Establish maximum capacity (50% of fire code).
- Consider extending the afternoon hours for the Farmer’s Market.

### Physical Spaces

- Post a sign at entry to Farmer’s Market prohibiting entry for ill individuals.
- Provide vendor spaces that allow for separation and social distancing a minimum of 6 feet apart.
- Provide hand sanitizing station at the entry to the Farmer’s Market.
- Disinfect all high touch areas, including light switches, door handles, sinks, sink handles, and countertops regularly.
- Suspend all sales events and parties until 6 feet social distancing guidelines are listed by the Governor.
- Use floor markings to show 6 feet distance for employees and clients.
- Provide hand sanitizer stations in conspicuous locations-every 50 feet of Farmer’s Market space.
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at the event and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), [Nevada OSHA](#), and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
Facilities

MANDATORY AS OF 6/26/2020:

- Face coverings are required for all activities except for high intensity activities including but not limited to running, sprinting, and cross training or under other exemptions established by Directive 024.
- If face coverings are removed when engaged in high intensity activities, appropriate measures must be taken to ensure social distancing at all times.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

**Mandatory**

**Spacing, Capacity, Numbers**

- Limit capacity (employees and members/clients) based on available space and ability to social distance with 6 feet between members/clients, except in facilities where instructor/student must be in close proximity (e.g. dance instruction, swimming, personal training, etc.).
- Set facility up for social distancing by spacing equipment to provide a 6-foot radius (as measured from the center of the main operation of the specific piece of equipment) or by disabling equipment (bike, treadmill, elliptical, etc.) to provide a 6-foot radius.
- For class settings, set up work areas before arrival of students, allowing at least a 6-foot radius around users.
- Reinforce spacing through training with employees, and reinforcement with members/clients.
- Remove excess seating throughout the facility to discourage lingering.
- Reduce class sizes, if necessary, to accommodate the required 6 feet of social distancing.
- Eliminate lost and founds.
- Establish log-in procedures for members/clients, and maintain that information for potential contact tracing.

**Sanitization**

- Hand washing or sanitization upon entry to facility.
- Use sanitizer products that meet the CDC guidelines.
- Have sanitizer available throughout the facility for employees and members/clients.
- Use a disinfectant on equipment between guest uses that has less than a 2 minute contact time.
- Provide cleaning products, disinfectants, and disinfecting wipes on EPA List N for disinfecting equipment before and after use by clients.
- Deep cleaning after hours or during low-use times for 24-hour facilities.

**Signage**

- In entry, post signs requiring social distancing and recommending face coverings.
- Post reminder signage for hand-washing, sanitization of equipment, distancing, etc.

**Recommended Best Practices**

**Spacing, Capacity, Numbers**

- When applicable, set aside specific hours for vulnerable populations.
- Provide space at entrance or in lobby area to allow spacing for coat racks and when used, kiosks for check-ins.

**Sanitization**

- If possible, provide foot pedals to open doors, or prop doors open to avoid contact.

**Signage**

- Post sign with COVID-19 screening questions.
- Post directional signage to encourage separation of entrances and exits.

**Air Circulation**

- Limit use of fans.
  - If fan use is necessary, place fans to blow away from members/clients.
- Open exterior doors when possible.
- If available and owner has access, open fresh air handlers.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**
**Lockers Rooms/ Public Restrooms**

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| Locker rooms for non-aquatic facilities are to be closed to the public. For combined locker rooms/public restrooms:  
- Clean and disinfect public areas and restrooms every 4 hours using EPA-registered disinfectants, particularly on high-touch surfaces such as faucets, toilets, doorknobs and light switches.  
- Disable or close-off showers except for rinsing before and after any pool activity.  
- Make sure supplies for handwashing, including soap and materials for drying hands are fully stocked every time the bathroom is cleaned.  
- Disable or close-off steam rooms and saunas.  
- If towels are provided, they are to be stored in covered, sanitized containers that are clearly delineated clean versus soiled. Appropriate temperatures are to be used when washing and drying towels to ensure sanitation (hot water for washing, ensure they are completely dried). Employees handling towels must wear gloves and face covering.  
- Restroom facilities should limit the number of users at any one time based on the facility size current social distancing guidelines. These facilities should be cleaned/sanitized per CDC recommended protocol along with established restroom cleaning schedules. | Remove or block off any casual seating.  
- Disable or block off lockers to discourage use. |

**Employees**

- Provide instruction/education on COVID-19 prevention.  
- Encourage employees to take their temperature and perform a self-assessment and not report to work if they are ill or exhibiting symptoms of COVID-19.**  
- Businesses must require all employees to wear facial coverings, except for one of the following reasons:  
  - Facial coverings in the work setting are prohibited by law or regulation  
  - Facial coverings are in violation of documented industry standards  
  - Facial coverings are not advisable for health reasons  
  a. Facial coverings are in violation of the business’ documented safety policies  
  b. Facial coverings are not required when the employee works alone in an assigned work area  
  c. There is a functional (practical) reason for an employee not to wear a facial covering in the workplace.  
  
  (*Businesses must provide written justification, upon request, explaining why an employee is not required to wear a facial covering in the workplace. At minimum, facial coverings (masks) should be cloth/fabric and cover an individual’s nose, mouth, and chin.*)  
- Maintain at least 6 feet from other employees and members/clients unless instruction makes it impractical.  
- Screen for temperature, history, exposure in accordance with CDC recommendations every work period (if symptomatic for illness, do not allow to work).**  
- Stagger shifts, breaks, and lunches to avoid mass entry/exit.  
- Wear gloves when appropriate and possible. Dispose of gloves between interactions with members/clients.  

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
**Roadmap to Recovery for Nevada**

**Fitness Facilities**

**MANDATORY AS OF 6/26/2020:**
- Face coverings are required for all activities except for high intensity activities including but not limited to running, sprinting, and cross training or under other exemptions established by Directive 024.
- If face coverings are removed when engaged in high intensity activities, appropriate measures must be taken to ensure social distancing at all times.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

**Mandatory**
- All clubs will limit access to members providing appropriate space for social distancing while in facilities.
- Access to exercise equipment will be regulated to ensure that proper distancing can be maintained within the clubs. Any equipment, in proximity, that does not allow for 6 feet of distancing will be designated inoperable/turned off.
- Contact sports such as basketball, volleyball, wrestling, and boxing are not permitted.
- Group fitness class participation will be limited to allow for 6 feet of spacing between members.
- Playroom areas will remain closed until local authorities deem playroom areas can be safely reopened. Upon reopening, those areas will follow best practices as determined by the local health district and business licensing department.
- Post informational signs regarding social distancing, facial coverings and what to do if symptomatic.
- Facilities and equipment will be cleaned with hospital grade chemicals outlined on EPA List N and CDC recommended on a frequent basis of no less than 1 time per shift. Following the directions on the label including contact time.
- Employees must perform daily self-symptom assessment.**
- Close employee break rooms until further notice.
- Close locker rooms until further notice.
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.).

**Facility Guidelines**
- Any member/guest who is experiencing COVID-19 symptoms or has been in close contact with friends or family members who have been diagnosed with COVID-19 or is in a higher-risk category will be encouraged to remain at home.
- Members are required to wear a mask whenever they are not actively exercising.
- Members will be required to maintain strict social distancing guidelines while in the facility.
- Members will be encouraged to wash hands frequently. Disinfectants will be provided to allow members to wipe down equipment before and after use. Disinfectants will be listed on EPA List N and will have a contact time of 2 minutes or less.
- Hand sanitizer stations will be available throughout the facilities.
- Close all water fountains and require members to bring their own water. Alternatively, touch-less water dispensers can used.
- Close locker rooms until further notice.
- Close all water fountains and require members to bring their own water. Alternatively, touch-less water dispensers can used.

**Member Guidelines**
- Face coverings are mandatory for all staff and guests.
- Any employee who is experiencing COVID-19 symptoms or has been in close contact with friends or family members who have been diagnosed with COVID-19 or is in a higher-risk category should notify their supervisor and remain home.
- All clubs will limit access to members providing appropriate space for social distancing while in facilities.
- Sick employees should follow CDC recommended steps which will be posted for all employees.
- Employees must perform daily self-symptom assessment.**
- Additional staffing will be dedicated to cleaning and disinfecting all areas of the club.
- Employees will disinfect all high touch points (including keyboards, telephones, handrails, and door handles) throughout all hours of operation.
- Require regular handwashing upon arrival, before meals and breaks, after using the restroom, blowing nose and before returning home.
- Employees will minimize face-to-face contact with other employees and work tasks that allow them to maintain a distance of 6 feet from other workers, customers, and visitors.
- Close employee break rooms until further notice.
- Close locker rooms until further notice.

**Employee Guidelines**
- Face coverings are mandatory for all staff and guests.
- Any employee who is experiencing COVID-19 symptoms or has been in close contact with friends or family members who have been diagnosed with COVID-19 or is in a higher-risk category should notify their supervisor and remain home. Sick employees should follow CDC recommended steps which will be posted for all employees.

MANDATORY AS OF 6/26/2020:

- Face coverings are required for all activities except for high intensity activities including but not limited to running, sprinting, and cross training or under other exemptions established by Directive 024.
- If face coverings are removed when engaged in high intensity activities, appropriate measures must be taken to ensure social distancing at all times.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

**Mandatory**

**Spacing, Capacity, Numbers**
- Limit capacity to 50% of fire code (employees and members/clients) based on available space and ability to social distance with 6 feet between members/clients, except in facilities where instructor/student must be in close proximity (e.g., dance instruction, swimming, personal training, etc.).
- Set facility up for social distancing by spacing equipment to provide a 6-foot radius (as measured from the center of the main operation of the specific piece of equipment) or by disabling equipment (bike, treadmill, elliptical, etc.) to provide a 6-foot radius.
- For class settings, set up work areas before arrival of students, allowing at least a 6-foot radius around users.
- Reinforce spacing through training with employees, and reinforcement with members/clients.
- Remove excess seating throughout the facility to discourage lingering.
- Reduce class sizes, if necessary, to accommodate the required 6 feet of social distancing.
- Eliminate lost and founds.
- Establish log-in procedures for members/clients, and maintain that information for potential contact tracing.

**Sanitization**
- Hand washing or sanitization upon entry to facility.
- Use sanitizer products that meet the CDC guidelines.
- Have sanitizer available throughout the facility for employees and members/clients.
- Use a disinfectant on equipment between guest uses that has less than a 2 minute contact time.
- Provide cleaning products, disinfectants, and disinfecting wipes on EPA List N for disinfecting equipment before and after use by clients.
- Deep cleaning after hours or during low-use times for 24-hour facilities.

**Signage**
- In entry, post signs requiring social distancing and face coverings.
- Post reminder signage for hand-washing, sanitization of equipment, distancing, etc.

**Recommended Best Practices**

**Spacing, Capacity, Numbers**
- When applicable, set aside specific hours for vulnerable populations.
- Provide space at entrance or in lobby area to allow spacing for coat racks and when used, kiosks for check-ins.

**Sanitization**
- If possible, provide foot pedals to open doors, or prop doors open to avoid contact.

**Signage**
- Post sign with COVID-19 screening questions.
- Post directional signage to encourage separation of entrances and exits.

**Air Circulation**
- Limit use of fans.
  - If fan use is necessary, place fans to blow away from members/clients.
- Open exterior doors when possible.
  - If available and owner has access, open fresh air handlers.
**Mandatory***

Locker Rooms/Public Restrooms

- Mandatory
- Recommended Best Practices

<table>
<thead>
<tr>
<th>Locker Rooms/Public Restrooms</th>
<th>Employees</th>
</tr>
</thead>
</table>
| - Locker rooms for non-aquatic facilities are to be closed to the public until further notice. For combined locker rooms/public restrooms:  
  - Clean and disinfect public areas and restrooms every 4 hours using EPA-registered disinfectants, particularly on high-touch surfaces such as faucets, toilets, doorknobs and light switches.  
  - Disable or close-off communal style showers except for rinsing before and after any pool activity.  
  - Make sure supplies for handwashing, including soap and materials for drying hands are fully stocked every time the bathroom is cleaned.  
  - Disable or close-off steam rooms and saunas.  
  - Restroom facilities should limit the number of users at any one time based on the facility size current social distancing guidelines. These facilities should be cleaned/sanitized per CDC recommended protocol along with established restroom cleaning schedules. |  
  - Provide instruction/education on COVID-19 prevention.  
  - Encourage employees to take their temperature and perform a self-assessment and not report to work if they are ill or exhibiting symptoms of COVID-19.**  
  - Businesses must require all employees to wear facial coverings, except for one of the following reasons:  
    - Facial coverings in the work setting are prohibited by law or regulation  
    - Facial coverings are in violation of documented industry standards  
    - Facial coverings are not advisable for health reasons  
    - Facial coverings are in violation of the business’ documented safety policies  
    - Facial coverings are not required when the employee works alone in an assigned work area  
    - There is a functional (practical) reason for an employee not to wear a facial covering in the workplace.  
  (Businesses must provide written justification, upon request, explaining why an employee is not required to wear a facial covering in the workplace. At minimum, facial coverings (masks) should be cloth/fabric and cover an individual’s nose, mouth, and chin.)  
  - Maintain at least 6 feet from other employees and members/clients unless instruction makes it impractical. |  
  - Screen for temperature, history, exposure in accordance with CDC recommendations every work period (if symptomatic for illness, do not allow to work).**  
  - Stagger shifts, breaks, and lunches to avoid mass entry/exit.  
  - Wear gloves when appropriate and possible. Dispose of gloves between interactions with members/clients. |

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**
This is intended for administrators and leaders of CFBOs – congregations and places of worship (churches, synagogues, mosques, temples, etc.) and community organizations. This guidance is intended to help CFBOs prevent the transmission of COVID-19 within their facilities and communities. CFBOs need to be able to react quickly if there is a confirmed COVID-19 case among staff, volunteers, the people they serve, or visitors. CFBOs, working together with schools, businesses, healthcare systems and state and local health departments, have an important role in slowing the spread of diseases, especially among high risk populations. CFBOs often serve those who are most vulnerable, such as older people and those with serious underlying health conditions – like heart disease, lung disease, and diabetes – who are at higher risk of developing severe COVID-19 illness. This may include members and regular attendees or people they serve as well as persons from the broader community.

**Mandatory AS OF 6/26/2020:**

- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

## Roadmap to Recovery for Nevada

### Guest Rooms

#### MANDATORY AS OF 6/26/2020:
- For guests, face coverings are required outside of guest rooms except for persons meeting the exemptions established by Directive 024.
- For employees, face coverings are required at all times, except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| ● Ensure minimum 6 feet between people, if not possible, install barriers.  
● Face coverings are required for all employees.  
● Employees must perform daily symptom assessment.**  
● Require employees to stay home if symptomatic.  
● Require regular handwashing.  
● Place hand sanitizers in high-contact locations. | ● Provide hand sanitizer stations on each floor. |

#### Employees

- Ensure minimum 6 feet between people, if not possible, install barriers.  
- Alternate end-of-day shift changes for social distancing.  
- Limit number of employees on employee elevators.  
- Clean and disinfect high-contact areas (e.g. door handles, elevator controls, etc.).

#### Shift Pattern

- Ensure minimum 6 feet between people.  
- Post social distancing signage and disinfect high-contact surfaces hourly.  
- Wash as much of the linen that comes in contact with guests.  
- Items that cannot be easily washed, like comforters and pillows, should be enclosed in coverings that are washed after each guest.  
- Disinfect high touched areas, taps, faucets, door and drawer handles, door latches, toilet or bath rails, telephones, thermostats, rails on balconies, light and lamp switches, remote control, curtain pulls and wands, guest information books, alarm clocks, hair dryers, irons and pens.  
- Use disinfectants outlined on EPA List N.

#### Physical Spaces/ Guest Rooms

- Carpet should be cleaned in a 3-step process:  
  1. Detergent and hot water  
  2. Disinfectant  
  3. Steam.  
- Disinfect soft furnishings.  
- Provide disposable plates, cups, utensils, etc. for in-room dining.  
- Remove hard-to-clean decorative pillows.

#### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.  
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.  
- Shutdown any facility for deep cleaning and disinfection, if possible.  
- Use disinfectants outlined on EPA List N.  
- Remove all linens.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

Prepared by the Local Empowerment Advisory Panel (LEAP)

Indoor Malls

MANDATORY AS OF 6/26/2020:
- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| ● For patrons, social distancing of 6 feet, outside of families or households, is required at all times.  
● All areas where patrons can congregate including seating areas and benches shall be closed; food court seating must comply with guidelines provided to food establishments including 6 foot spacing of tables.  
● Mall operators shall limit the number of patrons in their facility at any given time to no more than 50% of allowed occupancy based on applicable fire code.  
● Mall Operators shall inform all stores/vendors that they are required to enforce 6 foot social distancing between patrons, including spacing in any lines as well as monitoring store entrance to ensure 50% capacity is maintained, if possible.  
● All restaurants, food courts, or food stands must comply with current reopening guidelines for food establishments.  
● Post signs encouraging patrons to adhere to 6 foot social distancing requirements, wear masks, and wash or sanitize hands.  
● Public bathrooms must be cleaned and sanitized regularly; and 6 foot social distancing maintained for any lines; establish regular cleaning schedules.  
● The following services will be suspended until further notice or discontinued: play areas, stroller rentals, mall-owned food court trays, food sampling, and mall-operated carousels.  
● Valets:  
  ● Valet employees must wear face coverings and gloves.  
  ● Each stand should have a hand sanitizer dispenser available for each guest.  
  ● Benches can not be in use, signage should incorporate social distancing.  
| ● Create a plan that meets all mandatory requirements and communicate that plan with all stores/vendors.  
● Consider providing masks for patrons to wear.  
● Monitor all mall entrances to ensure that only 50% allowed occupancy is maintained at all times.  
● Provide hand sanitizing stations.  
● Public bathrooms cleaned every 2 hours with special attention to high use surfaces.  
● Public bathrooms should be monitored by staff to ensure that 6 foot social distances are maintained in lines and hand washing areas as feasible.  
● Increase frequency of cleaning of all common and high use areas including elevators and handrails.  
● HVAC systems should be cleaned, and filters changed prior to opening; continued monitoring of filters and cleaning of system as practicable.  
● Stay up-to-date on the latest guidance issued by the CDC, state and local health authorities.  |

<table>
<thead>

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause. 
Prepared by the Local Empowerment Advisory Panel (LEAP)

**MANDATORY AS OF 6/26/2020:**

- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

### General

- Ensure minimum 6 feet between people.
- Employees must perform daily self-symptom assessment.**
- Require employees to stay home if symptomatic.
- Require frequent and thorough hand washing, including providing employees, athletes, and visitors with a place to wash their hands. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.
- Stagger or limit arrivals of employees, athletes, and visitors.
- Provide hand sanitizer stations.
- Post informational signs regarding social distancing, facial coverings and what to do if symptomatic.
- Stay up-to-date on the latest guidance issued by the CDC, state, and local health authorities.

### Shared Spaces

- Ensure minimum 6 feet between people, adjust floor plan or seating venue, as applicable.
- Establish maximum capacity (not to exceed 50% of the fire code).
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, toilets, countertops, phones, tables, etc.).
- Disinfect or wash furniture between each customer.
- Disinfect shared spaces between uses.
- Use disinfectants outlined on EPA List N.
- Do not use communal water fountains.
- Require frequent and thorough hand washing, including providing employees, athletes, and visitors with a place to wash their hands. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.
- Provide hand sanitizer stations throughout the entire facility.
- No touch rule- coaches should refrain from high fives, handshake lines, and other physical contact with teammates, opposing players, coaches, and fans. A “tip of the cap” can be used in lieu of a handshake.
- Stay up-to-date on the latest guidance issued by the CDC, state, and local health authorities.

### Confirmed Cases

**Daily symptom assessment should include monitoring for fever, cough, and trouble breathing.**

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.

**Recommended Best Practices**

- Take temperature of employees daily upon entry.
- Enable natural workplace ventilation.
- Health questionnaire for symptoms at entry.
- Encourage personnel to work from home whenever possible and feasible with business operations.
- Whenever possible, equipment and personal items should have proper separation and should not be shared. If equipment must be shared, proper disinfection should be administered between users.
- Consider digital check-in and registration for all events and activities.
- Individual water containers are recommended.
- Individuals should not exchange items.

- Close any public gathering areas not necessary for the event.
- Use disposable cups, plates, utensils, etc.
- Provide individually packaged snacks.
- Use shared spaces 1 group at a time.
- Cancel/postpone events when social distancing guidelines cannot be met.
- Divide essential staff into groups and establish rotating shifts.
- Availability of at least 3 weeks of cleaning supplies.
- All equipment (e.g. balls, gloves, helmets, etc.) should be disinfected after each use or every 30 minutes.
- Facility, the team, and/or coaches should have bottled drinks on hand, in case a player forgets his or her water bottle.
- Use disinfectants outlined on EPA List N.

- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

---

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
**Employees and Guests**

- Ensure minimum 6 feet between people, if not possible, install barriers.
- Employees must perform daily self-symptom assessment.**
- Require employees to stay home if symptomatic.
- Require frequent and thorough hand washing, including providing more areas for hand washing. If soap and running water are not immediately available, provide alcohol-based hand sanitizer.
- Staffer or limit arrivals of employees and guests.
- Personnel should work from home, if possible.
- Face coverings are required for employees and guests.
- Stay up-to-date on the latest guidance by the CDC, state, and local health authorities.

**Shift Pattern**

- Daily disinfection of desks, workstations, and physical spaces.
- Change shift patterns (e.g. fewer shifts).
- Stagger lunch and break times.

**Physical Spaces**

- Ensure minimum 6 feet between people; adjust floor plan, if applicable.
- Limit capacity to 50% of fire code occupancy or 50 people, whichever is lower, per screen.
- Clean and disinfect hand rests, trays, and cup holders between each movie.
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinet handles, appliance handles, toilets, countertops, phones, tables, etc.)
- Alternate rows between customers.
- Utilize remote ticketing.
- Use disinfectants outlined on EPA List N.
- Train staff on new operation plan.
- Provide hand sanitizer stations.
- Split into sub-teams, limit contact across sub-teams.
- Close cafeteria and gathering spaces if possible or conduct regular cleanings.
- Provide hand sanitizer stations.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

**Confirmed Cases**

- Immediately isolate and seek medical care for any individual who develops symptoms while at the event and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

---

**Mandatory AS OF 6/26/2020:**

- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

---

**Recommended Best Practices**

- Train staff on new operation plan.
- Provide hand sanitizer stations.
- Split into sub-teams, limit contact across sub-teams.
- Close cafeteria and gathering spaces if possible or conduct regular cleanings.
- Provide hand sanitizer stations.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

# Roadmap to Recovery for Nevada

## Outdoor Equine and Livestock Competitions

### General Considerations

<table>
<thead>
<tr>
<th>Mandatory*</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Create an Emergency Response Plan specific to a COVID-19 incident or outbreak that includes local medical resources and addresses outbreak protocols, including medical evaluation, isolation and quarantine, and reporting.</td>
</tr>
<tr>
<td>● Provide training for competition staff, volunteers, and licensed officials regarding all procedures and requirements associated with a COVID-19 Plan.</td>
</tr>
<tr>
<td>● Inform all participants, officials, and competition personnel of protocols and safeguards implemented for their protection against spreading COVID-19 by providing them with a list of such measures.</td>
</tr>
<tr>
<td>● Conduct daily symptom assessments.**</td>
</tr>
<tr>
<td>● A participant should not be disqualified or penalized for wearing a face covering while competing.</td>
</tr>
<tr>
<td>● Require frequent and thorough hand washing, including providing all staff, officials, volunteers, service providers, and participants with a place to wash their hands. If soap and water are not immediately available, provide alcohol-based hand sanitizer.</td>
</tr>
</tbody>
</table>

### Recommended Best Practices* |

| ● Provide hand sanitizer stations. |
| ● Consider temperature monitoring for volunteers, officials, competition staff, and service providers once daily prior to entering the competition grounds. |
| ● Post informational signs regarding social distancing, face coverings, and what to do if symptomatic. |

### Social Distancing/ Limiting Entries and/or Stabling

| ● Organize horse arrivals and departures to limit contact between people. |
| ● Arrange judge’s and other officials’ areas to comply with social distancing requirements. |
| ● Restrict competition office access to essential personnel only. Configure the space and limit the number of office staff to comply with social distancing and limit the number of participants who can enter the competition office at one time (e.g. schedule check-in/check-out times). |
| ● Configure stabling to comply with social distancing requirements to manage concentration of horses and people. This may limit stalls available for the event. |

| ● Competition Organizers may limit entries to the competition and/or to specific sections/classes within the competition to manage the concentration of horses and people. Competition organizers must give notice if entries are to be limited. |
| ● The limiting of stables should be done on a first come, first serve basis. Relevant information should be posted on the competition website. |
| ● Establish a system for notifying and “wait-listing” individuals who submit stabling requests after the available spaces are filled. The method should be applied equally to all potential participants. |

---

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**

**MANDATORY AS OF 6/26/2020:**

- Face coverings are required for all activities except for high intensity activities including but not limited to running, sprinting, and cross training or under other exemptions established by [Directive 024](#).
- If face coverings are removed when engaged in high intensity activities, appropriate measures must be taken to ensure social distancing at all times.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

---

Prepared by the Local Empowerment Advisory Panel (LEAP)
<table>
<thead>
<tr>
<th>General Considerations for Competition Organizers</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>• Consider limiting the number of entrances and exits to the venue to manage the number of individuals accessing the competition grounds.</td>
</tr>
<tr>
<td>• Use radio, phone, and online communication methods as much as possible and communicate important information frequently throughout the competition grounds.</td>
</tr>
<tr>
<td><strong>Recommended Best Practices</strong>*</td>
</tr>
<tr>
<td>• VIP and other social areas are strongly discouraged unless social distancing requirements are enforced in accordance with all applicable federal, state, and local regulations, requirements, and orders, as well as CDC guidelines as they relate to mass gatherings and sporting events.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Cleaning/ Sanitizing Locations</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>• Provide hand sanitization stations with access to soap and water or alcohol-based hand sanitizer at each competition area and schooling/warm up area.</td>
</tr>
<tr>
<td>• Provide hand sanitizer to all officials, ring crew, office staff, and maintenance staff.</td>
</tr>
<tr>
<td>• Regularly disinfect all high touch surfaces.</td>
</tr>
<tr>
<td>• Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.)</td>
</tr>
<tr>
<td>• Prohibit the use of public water fountains.</td>
</tr>
<tr>
<td><strong>Recommended Best Practices</strong>*</td>
</tr>
<tr>
<td>• Strongly encourage all competitors to complete entry forms, in their entirety, including having all requisite memberships in place, prior to entering competition office.</td>
</tr>
<tr>
<td>• Strongly encourage that all entries, adds, scratches, feed and bedding orders, and billing/invoicing are done electronically.</td>
</tr>
<tr>
<td>• Provide an “in” door and an “out” door, if possible.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Competition Office</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>• Install clear plastic, glass, or other type of protective shield/barrier in front of office staff.</td>
</tr>
<tr>
<td>• Provide hand sanitizer near the dor.</td>
</tr>
<tr>
<td>• Provide markers to delineate 6 feet spacing between people in the office and in any waiting lines (e.g. markers on floor).</td>
</tr>
<tr>
<td>• Prepare and email competitor bills as early as possible.</td>
</tr>
<tr>
<td>• Establish appointment times for checkout at the competition office.</td>
</tr>
<tr>
<td><strong>Recommended Best Practices</strong>*</td>
</tr>
<tr>
<td>• Consider requesting provision of pre-packaged food only.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Service Providers and Vendors</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>• Advise any service providers (e.g. vendors, foodservice, farrier, feed suppliers, waste disposal personnel, etc.) to take precautions in accordance with federal, state, local, and facility regulations and CDC guidelines.</td>
</tr>
<tr>
<td><strong>Recommended Best Practices</strong>*</td>
</tr>
<tr>
<td>• At events with multiple competition areas, consider designating one area as primary where assigned times and/or orders of go take precedence.</td>
</tr>
<tr>
<td>• Consider utilizing technology for information transfer to mitigate the risk of virus spread by the manual transfer of paper (e.g. judge’s cards, scoresheets, etc.).</td>
</tr>
<tr>
<td>• Create a method of giving ribbons and trophies that reduces or eliminates hand-to-hand contact.</td>
</tr>
<tr>
<td>• Provide monitors to ensure compliance with requirements and best practices.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Competition, Schooling/Warm-up/ Exercise Area Considerations</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>• Utilize posted orders of go and/or published ride times, including online orders of go and ride times.</td>
</tr>
<tr>
<td>• Schedule course walks/arenas as necessary to comply with social distancing requirements (e.g. schedule small groups in separate sections).</td>
</tr>
<tr>
<td>• Utilize individual water bottles versus community water coolers.</td>
</tr>
<tr>
<td>• Limit and/or block out seating areas or organize seating areas to comply with social distancing requirements.</td>
</tr>
<tr>
<td>• Restrict the number of people accompanying a horse to the competition area to those persons who are needed for safety or for achieving effective competition, but they all must comply with social distancing requirements.</td>
</tr>
<tr>
<td><strong>Schooling/Warm-Up and Exercise Area Provisions:</strong></td>
</tr>
<tr>
<td>• Provide monitors to ensure compliance with requirements and best practices.</td>
</tr>
<tr>
<td>• Provide sanitizing items at each competition area and schooling/warm-up area.</td>
</tr>
<tr>
<td>• Advise individuals to wear gloves while handling the jumps or arena items and to wipe them down after use.</td>
</tr>
<tr>
<td><strong>Recommended Best Practices</strong>*</td>
</tr>
<tr>
<td>• Consider requesting provision of pre-packaged food only.</td>
</tr>
<tr>
<td>• At events with multiple competition areas, consider designating one area as primary where assigned times and/or orders of go take precedence.</td>
</tr>
<tr>
<td>• Consider utilizing technology for information transfer to mitigate the risk of virus spread by the manual transfer of paper (e.g. judge’s cards, scoresheets, etc.).</td>
</tr>
<tr>
<td>• Create a method of giving ribbons and trophies that reduces or eliminates hand-to-hand contact.</td>
</tr>
<tr>
<td>• Provide monitors to ensure compliance with requirements and best practices.</td>
</tr>
<tr>
<td>Competition, Schooling/ Warm-up/ Exercise Area Considerations cont.</td>
</tr>
<tr>
<td>---</td>
</tr>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>● Schooling/Warm-Up and Exercise Area Provisions:</td>
</tr>
<tr>
<td>● Determine equine/human capacity in relation to the area and restrict access to a limited number to maintain social distancing requirements.</td>
</tr>
<tr>
<td>● In classes where participants compete collectively, the Competition Organizer must determine and communicate to participants, the maximum number of horses permitted in each competition area at one time based on the size of the competition areas and social distancing requirements.</td>
</tr>
<tr>
<td>● Communicate with participants if classes will be divided and held as separate classes or split and held in one or more than one section.</td>
</tr>
<tr>
<td>● Consider providing different awards to each class.</td>
</tr>
<tr>
<td>● Classes may split into sections with the final section being comprised of the best entrants.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Stabling Considerations</strong></td>
</tr>
<tr>
<td>● Restrict access of stabling areas to veterinarians, athletes, officials, grooms, trainers, and other essential personnel.</td>
</tr>
<tr>
<td>● Remind all personnel in the stabling areas to comply with all best practices and guidelines in effect at the competition.</td>
</tr>
<tr>
<td>● Provide hand sanitization stations in the stabling area and encourage stable personnel to use frequently.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Participants</strong></td>
</tr>
<tr>
<td>● Limit access to stabling area and competition grounds to essential personnel only.</td>
</tr>
<tr>
<td>● Consider having riders meet their horses at the competition or schooling areas/warm-up areas or other pre-designated area to further limit contact in the stabling area.</td>
</tr>
<tr>
<td>● Consider the use of mounting blocks to avoid one-on-one contact between riders and grooms/assistants. Provide adequate food and beverage supplies for your barn and your support staff for the duration of the competition to avoid unnecessary community exposure.</td>
</tr>
<tr>
<td>● Provide hand sanitizer, gloves, face coverings, and other PPE necessary to your barn staff and other personnel and encourage them to use these items on a regular basis.</td>
</tr>
<tr>
<td>● Do not mix equipment (e.g. tack, grooming supplies, lead shanks, etc.) and sanitize between each use.</td>
</tr>
<tr>
<td>● Regularly sanitize bikes/motorbike/gold carts/car and truck door handles, stable doors, bucket handles, light switches, etc., and equipment, including tack, grooming feeding, stall cleaning materials, etc.</td>
</tr>
<tr>
<td>● Schedule competition days (ride times, schooling times, etc.) as efficiently as possible to minimize time spent on</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>Signage</strong></td>
</tr>
<tr>
<td>● Post signage that displays all applicable federal, state and local regulations, requirements and orders as well as WHO recommendations and CDC guidelines as they relate to mass gatherings and sporting events in effect at the competition.</td>
</tr>
<tr>
<td>● Post signage identifying 6-foot social distancing for spectators waiting to enter competition grounds.</td>
</tr>
<tr>
<td>● Post signage throughout the competition grounds (i.e. competition office, competition areas, arenas, pavilions and schooling areas, barns, stalls, etc.) which includes recommendations about good hygiene along with informing participants and others about ways to reduce the risk of COVID-19 transmission. Posters need to meet the CDC guidelines -- Stop the Spread of Germs.</td>
</tr>
</tbody>
</table>
**Mandatory**

<table>
<thead>
<tr>
<th><strong>Signage</strong></th>
</tr>
</thead>
</table>
| ● Post signage at all entrances to the competition grounds which identifies the symptoms of COVID-19 and states the following:  
  ● To protect others from possible transmission of the virus, anyone who exhibits COVID-19 symptoms or has been in contact with someone who has tested positive for COVID-19 within the last two weeks, cannot enter the competition grounds. These individuals are encouraged to contact their health care provider immediately for further medical advice and must obtain documented clearance from their health care provider before entering the competition grounds. Participants must assume responsibility for themselves and their own staff (e.g. grooms, assistants, etc.). Posters with Symptoms of Coronavirus Disease are placed throughout the property.  |

<table>
<thead>
<tr>
<th><strong>Spectator Seating, High Traffic, &amp; Congested Areas</strong></th>
</tr>
</thead>
</table>
| ● Organizers should screen all spectators regarding travel history, contact with individuals who may have tested positive for COVID-19, and presence of any signs or symptoms consistent with COVID-19.  
  ● Organizers must limit occupancy of grandstands/seating to 50% occupancy and spectators may sit in groups of no larger than 50 persons. Social distancing is required between groups of spectators.  
  ● Organizers must remind spectators on the importance of wearing face coverings covering both the nose and the mouth. Organizers may require all spectators to wear face coverings in the grandstands.  
  ● Provide sanitizing stations.  
  ● In highly congested areas, try to provide six feet markings to follow social distancing recommendations.  
  ● Place signage around spectator seating and highly congested areas regarding safe distancing.  
  ● Organizers should disinfect spectator seating and heavily congested areas after each performance.  |

<table>
<thead>
<tr>
<th><strong>Confirmed Cases</strong></th>
</tr>
</thead>
</table>
| ● Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.  
  ● Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.  
  ● Shutdown any facility for deep cleaning and disinfection, if possible.  
  ● Use disinfectants outlined on [EPA List N](https://www.epa.gov).  |

<table>
<thead>
<tr>
<th><strong>Recommended Best Practices</strong></th>
</tr>
</thead>
</table>
| ● Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.  
  ● Once testing is readily available, test all suspected infections or exposures.  
  ● Following testing, contact local health department to initiate appropriate care and tracing.  |

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), [Nevada OSHA](https://www.osha.gov), and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
### General

- Ensure minimum 6 feet between people.
- The entrance to an attraction should include social distancing markers of 6 feet. Families that live in the same household should not be expected to social distance.
- All employees and guests must wear face coverings unless exempted. Face coverings should not be placed on children younger than 2 years of age, anyone who has trouble breathing, or is unconscious, incapacitated, or otherwise unable to remove the cover without assistance.
- Reduce attraction capacity to allow for appropriate physical distancing. No more than 50% of the current capacity.
- Place acrylic (plexiglass) or other types of barriers/hygiene screens between guests and staff in frequent, close interaction areas wherever practical to reduce contamination. Disinfect the barriers/hygiene screens regularly.
- Employees must perform daily self-symptom assessment.
- Require employees to stay home if symptomatic.
- Require regular handwashing.
- Stagger or limit arrivals of employees and guests.
- Provide hand sanitizer stations.
- Post informational signs regarding social distancing, facial coverings and what to do if symptomatic.
- Stay up-to-date on the latest guidance issued by the CDC, state, and local health authorities.
- Close all water fountains.
- Only sell pre-packaged food at any concessions.
- Review all federal, state, and local food safety guidelines.
- Alternate schedules to avoid employees taking breaks at the same times in the same locations. Consider reducing the use of shared equipment (e.g. computers, phones, radios, etc.). If equipment must be shared, employees should wash/sanitize their hands before and after using that equipment and the high-touch surfaces on the equipment should be sanitized frequently.

**Mandatory as of 6/26/2020:**

- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

**Recommended Best Practices:**

- Utilize touch-free/contactless payment options when possible.
- Reduce face-to-face transactions when possible.
- Encourage guests to purchase tickets online if possible. Consider all-inclusive package offers.
- Ensure your first aid protocols address how to manage employees or guests with COVID-19 symptoms. If first aid is staffed internally, provide the appropriate Personal Protective Equipment (PPE).
- Develop an isolation/quarantine area for the individual and his or her immediate party while any assessment is completed.
- Proactively communicate guidelines and expectations for health and hygiene procedures and precautions in the front-of-house areas for guests and in the behind-the-scenes areas for employees.
- Clearly mark physical distancing spaces/guidelines with floor markings, seat, markings, or signs to make it easy for guests to understand what is expected.
- Identify realistic capacities for common areas. Keep in mind that limiting attraction queues and attraction capacities may increase the number of people in common areas. It is better to be conservative on your initial estimates, monitor guest flow, resolve problem areas, and adjust your plan frequently.
## Sanitation, Housekeeping, & Cleaning Operations

- **Mandatory***
  - Disinfect high-touch areas frequently. Those include: door handles, trash receptacle touchpoints, control equipment, phones, computers, office equipment, counters, elevator buttons, handrails, tables, seats, benches, high chairs, toilets, sink faucets and toilet handles, soap dispenser push plates, baby changing stations, ice scoops, refrigerator handles, towel dispenser handles, cleaning tools, counter tops, door knobs, light switches, sinks, queue rails, harnesses, restraints, ATM machines, dining surfaces, etc.
  - Consider removing high-touch surfaces (e.g. doors) if they aren't completely necessary.
  - Use disinfectants outlined on [EPA List N](https://www.epa.gov/). Consult product specifications to determine how often cleaning should take place.
  - If restrooms are open:
    - Consider dedicating employees to cleaning/disinfecting restrooms frequently. They should also monitor/control restroom capacity to uphold physical distancing guidelines in those facilities.
    - Consider closing or otherwise disabling every other (or every two) toilets to ensure guests maintain physical distancing protocols in restrooms.
    - Post a log in visible site of times restrooms are cleaned.
  - Disinfect ride surfaces frequently touched by guests or employees, including handrails, arm rests, restraints, lap bars, grips, seatbelts, over-the-shoulder harnesses, etc.

- **Recommended Best Practices***
  - The frequency and approach to sanitizing should be based on the guidelines provided on the cleaning chemicals, which should be determine based on the surface being cleaned.
  - When physically verifying that safety gates are locked and secured, operators can use their feet or knees to check movement. If hands must be used to ensure a gate is locked, operators should wash/sanitize hands before moving on to another task.
  - Consider reducing the number of guests per ride vehicle to facilitate physical distancing between riders.
  - Board family members/others living in the same household in the same vehicle when possible.
  - Carefully evaluate attractions that require time-consuming personal harnessing like ropes courses, climbing walls, and steel-cable swing rides because of the difficulty managing personal distancing during the harnessing process. The increased cleaning and sanitizing of the harnesses and other equipment between each use may also be difficult and time consuming.
  - For miniature golf courses, consider ways to reduce surfaces guests touch frequently. Several approaches to reduce guest contact with the holes on the course include placing a piece of round coated foam (like a swimming pool noodle) in a mini-golf hole to reduce the depth of the hole or removing routes where balls drop into hole-in-one cups and have them roll onto the carpet instead. For courses that print custom scorecards, allow guests to get their own ticket out of the printer. Disinfect balls, putters, and pencils after each use.

---

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
### Spectator Seating, High Traffic, & Congested Areas

- Organizers should screen all spectators regarding travel history, contact with individuals who may have tested positive for COVID-19, and presence of any signs or symptoms consistent with COVID-19.
- Organizers must limit occupancy of grandstands/seating to 50% occupancy and spectators may sit in groups of no larger than 50 persons. Social distancing is required between groups of spectators.
- Organizers must remind spectators on the importance of wearing face coverings covering both the nose and the mouth. Organizers may require all spectators to wear face covering in the facility.
- Provide sanitizing stations.
- In highly congested areas, try to provide 6 feet markings to follow social distancing recommendations.
- Place signage around spectator seating and highly congested areas regarding safe distancing.
- Organizers should disinfect spectator seating and heavily congested areas after each event.

### Signage

- Post signage that displays all applicable federal, state and local regulations, requirements and orders, as well as WHO recommendations and CDC guidelines as they relate to mass gatherings and sporting events in effect at the facility.
- Post signage identifying 6-foot social distancing for spectators waiting to enter the facility.
- Post signage at all entrances to the facility which identifies the symptoms of COVID-19 and states the following:
  - To protect others from possible transmission of the virus, anyone who exhibits COVID-19 symptoms or has been in contact with someone who has tested positive for COVID-19 within the last two weeks, cannot enter the facility. These individuals are encouraged to contact their health care provider immediately for further medical advice and must obtain documented clearance from their health care provider before entering the facility. Participants must assume responsibility for themselves and their own staff. Posters with Symptoms of Coronavirus Disease are placed throughout the property.
  - Post signage throughout the facility which includes recommendations about good hygiene along with informing participants and others about ways to reduce the risk of COVID-19 transmission. Posters need to meet the CDC guidelines – Stop the Spread of Germs.

### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
# Body Art and Body Piercing Establishments

## Mandatory*

- Ensure minimum 6 feet between people, if not possible, install barriers.
- Employees must perform daily self-symptom assessment.**
- Require employees to stay home if symptomatic.
- Require regular handwashing upon arrival, before meals and breaks, after using the restroom, blowing nose and before returning home.
- No body art may be done around the nose or mouth due to facial coverings.
- Provide hand sanitizer stations.
- Post informational signs regarding social distancing, facial coverings and what to do if symptomatic.

## Recommended Best Practices*

- Provide hand sanitizer stations.

## Employees & Customers

- **Employees**
  - Daily symptom assessment should include monitoring for fever, cough, and trouble breathing.
  - If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

## Shift Pattern

- Keep customers to a minimum in the waiting room.
- Encourage customers with appointments to wait in their car or parking lot.
- Disinfect all high touch surfaces in between guests.
- Persons with appointments should be the only ones on the premises.

## Physical Spaces/Workstations

- Ensure minimum 6 feet between people.
- Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.).
- Wear gloves and face masks.
- Requiring handwashing.
- Disinfect or wash furniture in between each customer.

## Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on EPA List N.

# Massage Establishment Sanitization Guidelines

## Supplies
- Soap in a covered dispenser.
- Single use or disposable towels.
- Waste receptacle.
- Hot/Cold water.
- EPA-approved disinfectant.

## Sanitize Between Each Client
- Therapists hands.
- All massage equipment.
- All furniture.
- All fixtures and massage tables.
- All electrical equipment used for the care of a client.
- All hydrotherapy equipment.
- All surfaces touched by a client (e.g. door handles, light switches, chairs, clothing racks, lockers, and other fixtures).
- Lubricant container.
- Cash registers and card/debit card systems.
- Writing instruments and intake clipboards.

## Other Areas to Disinfect at Least Daily
- Phones and tablets.
- Towel warmer.
- Dispensary cabinet and sink.
- Restroom fixtures and hand washing station.
- Stocked retail items.
- Treatment room cabinetry and décor.
- Remotes (e.g. candles, lighting, music, etc.).
- Mini-refrigerator.
- Reception area furniture, desks, computers, and decorations.

## Single Use Items
- To be thrown away after one use:
  - Table paper.
  - Disposable face cradle covers.
  - Gloves
  - Hair ties, barrettes, and/or scrunchies.

## Mandatory*

Prepared by the Local Empowerment Advisory Panel (LEAP)

Roadmap to Recovery for Nevada

Massage Therapy

MANDATORY AS OF 6/26/2020:

- Face coverings are required except for persons meeting the exemptions established by Directive 024.
- If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

Mandatory*

Workplace Accommodations for Licensees and Other Employees

- Massage therapists, masseuses, other employees, and customers must wear face coverings.
- Establishments should ensure that licensees and employees understand that face masks may not protect the licensee or employee from inhaling airborne pathogens. However, the masks do reduce the risk of the licensee or employee adding to the viral load in the establishment.
- Social distancing recommendations provided by the CDC, OSHA, Governor’s Directives and/or local jurisdictions should be maintained. High traffic establishments may want to install plexiglass shields in client intake areas such as reception desks.
- Online client intake and release forms are recommended. When this is not possible pens and clipboards should be sanitized between each use.
- If a client responds to any of the screening questions listed below, the licensee has the right to refuse service.
- The CDC and OSHA recommend that any employee with a temperature above 100.4 degrees Fahrenheit not report to work.

Sanitation Guidelines for Establishments

- Establishments shall continue to follow the regulations provided in NAC 640C.200-360 with emphasis on NAC 640C.200(2)(b). Additional emergency regulations approved by the Board on May 8, 2020, require the establishment and licensees to ensure that normal sanitation practices completed on a daily basis are now completed between each client.
- Based on the CDC and OSHA recommendations all establishments should be cleaned and then disinfected with a product on the Environmental Protection Agency (EPA) List-N, shown to meet the EPA’s requirements as being effective against SARS-CoV-2. If possible, the product selected should also be bactericidal and fungicidal. The importance of ensuring the contact time with the product is critical to its effectiveness. Since contact times vary, establishments should ensure that EPA recommendations are observed.
- Steam rooms, saunas, and spas shall remain closed and unavailable for guest use.
- Social distancing in waiting areas and locker rooms should be maintained at the distance recommended by the CDC, OSHA, Governor’s Directives, and/or local jurisdictions. As each guest enters the facility, they should be informed of the social distancing practice being observed by the establishment. Adequate time should be provided between scheduled appointments including staggering appointments to reduce the number of clients in waiting rooms in order to comply with social distancing recommendations. For establishments with single treatment rooms, it is recommended that the client remain in their car until the licensee informs the client that they are ready for their appointment.
- Remove unnecessary items from waiting areas, locker rooms, restrooms and treatment rooms. All surfaces in these areas should be sanitized between each use. Porous surfaces should be covered with a nonporous protective layer which should then be disposed of or sanitized between each client.
- Phones, computers, cash registers, credit card equipment and other items used by employees or licensees to conduct business, should be sanitized between each client. Reception desk staff should minimize their exposure to items touched by the client or guest. If possible, allow clients to swipe or insert their own credit card. If cash transactions are unavoidable, follow the handwashing protocol and sanitize any surface that came into contact during the exchange.
Sanitation Guidelines for Establishments cont.

- Public contact with retail products should be minimized. Clients or guests may select their products and place them in a bag or other receptacle. Items in the bag not purchased should be sanitized before being returned to the stock. Remove all testers from the retail area, locker rooms, and waiting areas. Personal items normally provided by the establishment should be provided by an employ upon request.
- Posting signage about the steps the establishment is taking to ensure client, employee, and licensee safety will help the public know your commitment to their health and safety. Establishments may consider adding information about the policies and practices to their websites.
- Requesting that a client or guest wash their hands or use hand sanitizer before, after, and during each treatment may help protect the licensee and employees.
- Client contact with non-sanitized floor surface should be minimized. For locations with flooring that cannot be sanitized between clients using a non-porous barrier to protect the client and the licensee from potential contaminates on the floor is advised. The barrier should be placed between where the client undresses and the table. For licensees that evaluate gate and require clients to walk in their treatment rooms, if the floor cannot be sanitized, a non-porous barrier should be used in the area where the client will be walking.
- All linens should be sanitized by washing with laundry detergent and hot water followed by drying using the highest setting. For establishments with linens provided by a service, the establishment should review the contract or contact the linen service to ensure proper sanitation guidelines are being followed.

Client Screening Recommendations

- No walk-ins are permitted, and licensees and therapists must only serve one client at a time.
- Prior to the licensee providing services, a basic screening of the signs and symptoms of COVID-19 should be conducted along with a health history intake form. Screening of existing clients should include at a minimum the following questions:
  - During the past 14 days have you experienced a fever, dry cough, fatigue, or systemic muscle aches or pain?
  - During the past 14 days have you or anyone in your home experienced a fever, dry cough, fatigue, or systemic muscle aches or pain?
  - During the past 14 days have you been around anyone who has experienced a fever, dry cough, fatigue, or systemic muscle aches or pain?
  - Are you currently residing with anyone who has tested positive for COVID-19 or is being quarantined for possible exposure to COVID-19 or any other pathogen?
  - Have you taken any medication in the past 6 hours that could have lowered your body temperature such as aspirin, Tylenol, or Ibuprofen?
  - Have you travelled outside the state of Nevada in the past 14 days?

Sanitation Guidelines for Massage Therapy, Reflexology, and Structural Integration

- Licensees shall continue to practice all sanitation guidelines provided for in NAC 640C.200-360 and additional guidelines adopted by the Board as part of the emergency regulations addressing COVID-19.
- Per the CDC hand washing with warm/hot water and soap for a minimum of 20 seconds remains the best sanitation practice available to licensees and the public.
- Licensees or spa attendants shall sanitize treatment rooms between each use with a product identified by the EPA as effective against the spread of SARS-CoV-2/COVID-19 and for the exposure time required by the EPA.
- Licensees shall sanitize their hands before and after every client and after handling any financial transaction. Computers, tablets, cellphones or other electronic devices used for scheduling or payment during transactions shall be sanitized after every use.

Personal Protective Equipment

- Employees and customers are required to wear a face cover unless exempted.
- Licensees who choose to wear additional personal protective equipment shall follow NAC 640C.240(3).
**Mandatory**

- Chair massage requires the sanitation of the entire chair between clients including but not limited to the face rest, chest pad, arm rest, seat, and knee rests with a product included on the EPA List-N.
- Therapists working at chair massage locations with one or more therapists should exercise social distancing as recommended by the CDC, OSHA, Governor’s Directives and/or local jurisdictions.
- Establishments and licensees may recommend that clients waiting for chair massage wear a mask and observe current social distancing guidelines.
- Licensees providing chair massage at a location other than one licensed by a municipality should ensure compliance with CDC and OSHA recommendations and observe current social distancing guidelines.
- Individuals using a Desk Buddy, pillow or other device to provide massage at an individual employee’s desk, in conference rooms or other locations should sanitize the surface (desk or table) that the device is resting on, sanitize the device upon arriving at the location, and after each client.

---

**Additional Sanitation Guidelines for Chair Massage**

- Licensees shall sanitize the table and any equipment before and after each client.
- Licensees shall place the linens used during the service in a receptacle that is sealed such as a plastic bag or tote.

---

**Additional Sanitation Guidelines for Outcall Massage**

- Reflexologists shall follow all guidelines provided for massage therapy. In addition, any reflexologists providing services to a client on a chair or table that has a porous surface, should ensure that the surface is completely covered by a nonporous protective layer that is either disposed of between each service or sanitized with a product specified by the EPA as effective against COVID-19 using the exposure time recommended for that product.

---

**Additional Sanitation Guidelines for Reflexology**

- Reflexologists shall follow all guidelines provided for massage therapy. In addition, any reflexologists providing services to a client on a chair or table that has a porous surface, should ensure that the surface is completely covered by a nonporous protective layer that is either disposed of between each service or sanitized with a product specified by the EPA as effective against COVID-19 using the exposure time recommended for that product.

---

Steps to Maintain Disinfected Tools & Implements

1. Disposable/Thrown Away after One Use:
   a. Once a single-use item has been used, it must be disposed of into the trash.

2. Disinfect by Submerging in Disinfectant:
   a. Remove all visible debris.
   b. Clean with soap and warm water.
   c. Submerge in an EPA registered disinfectant following the label's instructions.
   d. Rinse, dry, and store in a clean, closed container.

3. Disinfect by Spraying or Wiping with Disinfectant:
   a. Remove all visible debris.
   b. Clean with soap and warm water.
   c. Spray or wipe items with an EPA registered disinfectant, so that item remains visibly wet for the recommended contact time.
   d. Rinse, dry, and store in a clean, closed container.

4. Launder in Washer/Dryer:
   a. Wash with detergent on hot cycle.
   b. Dry immediately on hot cycle until completely dry.
   c. Store in dust-free closed cabinets.
   ● Consult the Nevada State Board of Cosmetology for disinfection information.

---

Disinfected Equipment

● Clean and disinfect all surfaces that come in contact with consumers, following the manufacturer’s directions. Product contact times and other factors may impact a product’s effectiveness.
● Consult the Nevada State Board of Cosmetology for disinfection information.

---

Additional Protocols

● Require employees to stay home if symptomatic and conduct daily symptom assessments.**
● Stagger appointments or have clients wait in their car until you are ready for them.
● Do not accept walk-in clients and estheticians and technicians must only serve one client at a time.
● Establishments must have partitions between stations or chairs OR arrange stations so that a minimum of 6 feet of separation between customers is maintained.
● Do not shake hands. There are safer ways to welcome a client in.
● For the time being, you should not allow any magazines, candy dishes, coffee pots, etc. in the facility.
● If possible, encourage clients to use a method of payment that does not require touch. If you are using any form of payment that requires touch, you must sanitize between every use.
● Have clients wash their hands upon entering the facility or use hand sanitizer.
   Wear a face covering while in the facility. Clients should also be asked to wear one when they can.
● Sanitize after each client.
● Require regular handwashing upon arrival, before meals and breaks, after using the restroom, blowing nose and before returning home.
● Post informational signs regarding social distancing, facial coverings and what to do if symptomatic.
● Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinetry handles, appliance handles, toilets, countertops, phones, tables, etc.).
● Put any new policies and procedures for staff and clients in writing.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
This is intended for administrators, Directors, and leaders of Schools and Training within the state of Nevada. This guidance is intended to help schools and Training Facilities prevent the transmission of COVID-19 within their facilities and communities. Schools and Training facilities need to be able to react quickly if there is a confirmed COVID-19 case among staff, volunteers, the people they serve, or visitors. Schools, businesses, healthcare systems and state and local health departments, have an important role in slowing the spread of diseases, especially among high risk populations. Within the State of Nevada, we have many different levels of training and instruction for many different industries.

Elementary and Secondary schools, Junior Colleges, Colleges and Universities should follow the direction of their State of Nevada governing agency with direct coordination with the Governor’s Office for the procedures and policies for reopening.

Trade and Apprenticeship training Schools, Professional and Management development training, Fine Art schools, Transportation Training: Flight & Automobile, Sports and Recreation Training, Educational Support Services, Exam preparation and Tutoring Services, all other Miscellaneous Schools and Instruction should adhere to the following procedures and policies while reopening.

### Mandatory*

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.**

<table>
<thead>
<tr>
<th>Classes and Instruction Sessions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mandatory</strong>*</td>
</tr>
<tr>
<td>- Start or continue distance learning, if possible, for all classes.</td>
</tr>
<tr>
<td>- Require face covering for all participants, including instructors and staff attending in-person trainings or education.</td>
</tr>
<tr>
<td>- Limit attendance, arrange seating, and/or stagger classes, so that a minimum 6 feet is maintained between all attendees, in all directions, at all times.</td>
</tr>
<tr>
<td>- Gatherings of more than 50 people are prohibited, including staff and instructors.</td>
</tr>
<tr>
<td>- A log should be kept of all attendees’ names and contact information.</td>
</tr>
</tbody>
</table>

### Recommended Best Practices*

**Provide hand sanitizer stations.**

Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*
Recommended Best Practice

breath fever, cough, and trouble should include monitoring for

* Daily symptom assessments

Team/Players

Mandatory*

- Training sessions shall be timed to allow at least a 30 minute break between the finish and start of subsequent sessions, to allow for departure and arrival without crowding.
- Players and coaches will be asked to arrive no earlier than 15 minutes prior to a session and depart no later than 15 minutes after completion.
- Participants should pick up their own trash at the conclusion of all practices and activities. Extra trash bins should be provided, and more frequent dumping should occur.
- All requirements must be shared prior to the practice with all players and coaches.
- Limit sports activities to those in which participants can maintain social distancing or close contact is limited and brief. Examples include golf, baseball, softball, cycling, swimming, diving, dance, tennis, disc golf, horseback riding, track and field, figure skating, curling, running, and pickleball.
- For sports activities in which participants cannot maintain social distancing and close contact is frequent or prolonged (e.g., football, competitive, cheer, lacrosse, basketball, wrestling, rugby, water polo, and hockey), activities should be limited to conditioning, drills, and practices in which dummy players, sleds, punching bags, and similar equipment are used.
- All coaches and managers are required to wear face coverings. Players should wear face masks except while playing or exercising (e.g. on the sidelines).

Recommended Best Practices*

- Parents or guardians should be discouraged from attending practice, but if they must, coaches and facility operators must require 6 feet of social distancing except for members of the same household.
- Coaches/adult leaders and players should check their temperatures before participation in soccer activities and ask/administer screening questions about symptoms in participants or their household members.**
- Players are strongly encouraged not to travel with other members of the team and only members of their immediate households.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.
- Promote healthy hygiene practices, such as hand washing as feasible.
- Provide hand sanitizer stations.
- Coaches and team managers should ensure that players are following COVID-19 related prevention measures included herein.

Team/Players

- Players’ personal items and equipment should be spaced out at least 6 feet apart.
- Players should use their own equipment as much as possible.
- Players must bring their own water/beverage to consume during and after practice. No shared drinking fountains or coolers.
- No shared/communal snacks.
- Conduct daily symptom assessments.**
- No touch rule - no high fives, handshakes or other physical contact.
- No spitting or eating seeds, gum, or other similar products.

- Encourage social distancing through increased spacing, small groups, and limited mixing between groups, and staggered scheduling, arrival, and drop off, if feasible.
- Promote healthy hygiene practices, such as hand washing wearing a cloth face covering, as feasible.
- Facility, the team, and/or coaches should have bottled drinks on hand, in case a player forgets his or her water bottle.
- Players should bring their own snacks; if snacks are provided, they should be individually packaged.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Following these guidelines does not constitute, and is not a substitute for, compliance with all laws and regulations applicable at any particular time. Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
Coaches/Parents

- Ensure social distancing for all practice activities.
- Coaches must clean and disinfect shared equipment before and after each practice and games. Use disinfectants outlined on [EPA List N](https://www.epa.gov/cleanwater/disinfectants).
- Parents must remain in their cars or drop off and pick players up afterwards.
- Enforce no touch rule – no high fives, handshakes or other physical contact.
- Stay up-to-date on the latest guidance issued by the CDC, state and local health authorities.

Medical Clearance

- Require medical clearances from those that had previously tested positive for COVID-19.
- For individuals who have experienced a known COVID-19 exposure in the past 14 days, home quarantine for 14 days is required. A medical clearance is required to return to practice following the home quarantine.
- Report the onset of any new symptoms immediately. Conduct daily symptom assessments.**
- Players should contact their physician and follow the recommendations, if they have any symptoms.
- Any player feeling unwell should not practice and immediately notify their coach/team manager.
- Any (or their family member) player presenting symptoms of COVID-19 (fever, cough, trouble breathing, etc.) should notify their coach and team manager immediately. All activities should be suspended until testing is complete.
- Any player (or their family member) who tests positive will require all team activities and practices to be canceled for 14 days.

Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at the event and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on [EPA List N](https://www.epa.gov/cleanwater/disinfectants).

Recommended Best Practices*

- Where feasible, adjust activities and procedures to limit sharing of items such as toys, belongings, supplies, and equipment.
- Train all coaches on health and safety protocols.
- Balls shared during practice should be changed out every 30 minutes with cleaned and disinfected balls.
- Before and after practice, teams should wash their hands for 20 seconds. If no handwashing station is available, then an appropriate hand sanitizer should be used.

- For individuals with pre-existing medical condition, written clearance from their physician should be provided. The written clearance should note that the player can participate fully, and the activity is recommended.

- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

*These recommendations were compiled by the LEAP based on guidance from the CDC, the U.S. Food and Drug Administration (FDA), Nevada OSHA, and other relevant agencies for the industry and public health officials, including state licensing boards. The information provided is only intended as general information to the public. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.
Baseball and Softball
PRACTICE ONLY

General Guidelines

- Training sessions shall be timed to allow at least a 30 minute break between the finish and start of subsequent sessions, to allow for departure and arrival without crowding.
- Players and coaches will be asked to arrive no earlier than 15 minutes prior to a session and depart no later than 15 minutes after completion.
- Participants should pick up their own trash at the conclusion of all practices and activities. Extra trash bins should be provided, and more frequent dumping should occur.
- All requirements must be shared prior to the practice with all players and coaches.

Coaches

- Conduct daily assessments of all coaches and players. Anyone experiencing symptoms must stay home. **
- Ensure social distancing for all practice activities.
- Coaches must wear masks at all times.
- Must clean and disinfect any shared equipment before and after practice.
- Have sufficient disinfectant on site.
- No team water coolers or shared drinking stations.
- Have additional bottled drinks on site.
- Enforce no touch rule – no high fives, handshakes or other physical contact.
- No spitting or eating seeds, gum, tobacco or similar products.
- Coaches must stay up to date on latest guidance from CDC, State and local authorities.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.

Prepared by the Local Empowerment Advisory Panel (LEAP)

MANDATORY AS OF 6/10/2020: NO TOURNAMENTS OR COMPETITIONS ALLOWED.

MANDATORY AS OF 6/26/2020: For children 10 and over, face coverings are required except for persons meeting the exemptions established by Directive 024 or unless the individual is participating in high-intensity activities. For children 2 to 9 years old, face coverings are recommended except when eating, drinking, swimming, or participating in high-intensity activities. If you have a medical condition preventing you from wearing a face covering, you are strongly encouraged to wear a face shield.

Mandatory*

- Parents or guardians should be discouraged from attending practice, but if they must, coaches and facility operators must require 6 feet of social distancing except for members of the same household.
- Coaches/adult leaders and players should check their temperatures before participation in soccer activities and ask/administer screening questions about symptoms in participants or their household members.**
- Players are strongly encouraged not to travel with other members of the team and only members of their immediate households.
- Post informational signs regarding social distancing, facial coverings, and what to do if symptomatic.
- Promote healthy hygiene practices, such as hand washing as feasible.
- Provide hand sanitizer stations.
- Coaches and team managers should ensure that players are following COVID-19 related prevention measures included herein.

Recommended Best Practices*

- Balls shared at practice should be replaced every thirty minutes with clean and disinfected balls.
- Train all coaches on health and safety protocols.
- Ensure players are practicing wearing masks while not active at practice (break periods).
- Before and after practice, ensure players are washing hands or using hand sanitizer.
- Use disinfectants outlined on EPA List N.
### Athletes

**Mandatory**
- Conduct daily assessment with coach. Anyone experiencing symptoms must stay home. **
- To the extent practicable, use own bat, gloves, helmet and any other equipment.
- Bring own bottled drink.
- Follow no touch rule – no high fives, handshakes or other physical contact.
- No spitting or eating seeds, gum, tobacco or similar products.
- Must ensure social distancing for all practice activities.
- Personal equipment and belongings must be lined up along fence and a minimum of 6 feet apart.
- Dugouts can only be used for break periods and limited by designated seat markings 6 feet apart.
- Players shall not congregate before or after practice.

**Recommended Best Practices**
- Players should wear masks while not active at practice (break periods).
- Hand washing or hand sanitizing, in the absence of soap and water, are strongly recommended for athletes.
- Whenever possible, equipment and personal items should have proper separation and should not be shared. If equipment must be shared, proper sanitation should be administered between users.
- Balls shared during practice should be changed out every 30 minutes with cleaned and disinfected balls.
- Before and after a practice teams should wash their hands for 20 seconds. If no handwashing station is available, then an appropriate hand sanitizer should be used.
- Use disinfectants outlined on [EPA List N](https://www.epa.gov/)

### Medical Clearance

- Require medical clearances from those that had previously tested positive for COVID-19.
- For individuals who have experienced a known COVID-19 exposure in the past 14 days, home quarantine for 14 days is required. A medical clearance is required to return to practice following the home quarantine.
- Report the onset of any new symptoms immediately. Conduct daily symptom assessments.**
- Players should contact their physician and follow the recommendations, if they have any symptoms.
- Any player feeling unwell should not practice and immediately notify their coach/team manager.
- Any (or their family member) player presenting symptoms of COVID-19 (fever, cough, trouble breathing, etc.) should notify their coach and team manager immediately. All activities should be suspended until testing is complete.
- Any player (or their family member) who tests positive will require all team activities and practices to be canceled for 14 days.

### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on [EPA List N](https://www.epa.gov/).

**For individuals with pre-existing medical condition, written clearance from their physician should be provided. The written clearance should note that the player can participate fully, and the activity is recommended.**

### General Guidelines

<table>
<thead>
<tr>
<th>Mandatory*</th>
<th>Recommended Best Practices*</th>
</tr>
</thead>
</table>
| ● All coaches and managers are required to wear face coverings. Players should wear face masks except while playing or exercising (e.g. on the sidelines).  
● Each field or training space shall be at least 10 yards from any other field or training space.  
● Training sessions shall be timed to allow at least a 30 minute break between the finish and start of subsequent sessions, to allow for departure and arrival without crowding.  
● Players and coaches will be asked to arrive no earlier than 15 minutes prior to a session and depart no later than 15 minutes after completion.  
● Disinfection spray should be used on soccer balls.  
● Use disinfectants outlined on [EPA List N](https://www.epa.gov). Ensure an accurate supply (at least 3 weeks) of hand sanitizer, face coverings (masks), and disinfectants. Use disinfectants outlined on [EPA List N](https://www.epa.gov).  
● Participants should pick up their own trash at the conclusion of all practices and activities. Extra trash bins should be provided, and more frequent dumping should occur.  
● No water or equipment should be shared. Belongings should be used only by the individual owner or operator.  
● Do not use communal water fountains.  
● No slide tackling is allowed. No centralized hydration or refreshment stations are allowed.  
● Jerseys/uniforms and practice vests/pinnies should be washed after each use.  
● All players and coaches must adhere to 6-foot physical distancing while at the practice.  
● Must conduct daily symptom assessments by coaches and players (self-evaluation). Anyone experiencing symptoms must stay home.**  
● All requirements must be shared prior to the practice with all players and coaches.  
● Daily deep disinfection of high contact surfaces (e.g. door handles, light switches, seats, railings, cabinet handles, appliance handles, toilets, countertops, phones, tables, etc.). | ● Each field complex shall have clearly marked and separate entry and exit areas.  
● Parents or guardians should be discouraged from attending practice, but if they must, coaches and facility operators must require 6 feet of social distancing except for members of the same household.  
● Portable restrooms at the field complex should be updated to include hand washing stations.  
● Coaches/adult leaders and players should check their temperatures before participation in soccer activities and ask/administer screening questions about symptoms in participants or their household members.**  
● No activities should include picking-up or making contact with one's hand with the ball (e.g. no throw-ins).  
● Players are strongly encouraged not to travel with other members of the team and only members of their immediate households.  
● Post informational signs regarding social distancing, face coverings, and what to do if symptomatic.  
● Promote healthy hygiene practices, such as hand washing as feasible.  
● Encourage coaches and team managers to disinfect equipment regularly.  
● Keep up with CDC and health-based organizations information regarding COVID-19 in relation to sport activities.  
● Coaches and team managers should ensure that players are following COVID-19 related prevention measures included herein. |

Individuals and businesses are responsible to ensure that they comply with all laws and regulations that apply to them, including, but not limited to, federal and state health and safety requirements. Additionally, compliance with these regulations does not ensure against the spread of infections from COVID-19 or any other cause.*

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.
### Mandatory*

- Must adhere to 6-foot social distancing practices off the field of play.
- Must wear face coverings at all times when not actively participating in the field of play.
- Players should be dropped off and picked up at the gate or in the parking lot. Parents should limit conversations with coaches. Use electronic communication methods.
- Limit contact with other teams. For example, kicking a soccer ball to another team is fine. Players should not pick-up or touch another teams’ equipment. No physical contact is allowed.
- No spitting on the field under any circumstances.
- Enforce no touch rule- no high fives, handshakes or other physical contact.
- Water bottles must not be shared.
- Players should limit touching equipment with their hands. Goals will be moved into place by coaches or team managers to limit the number of players touching them. During practice, the goals have the potential for many players touching them.
- Limit access to lockers or locker rooms but maintain access to restrooms and showers.
- Make sure supplies for handwashing, including soap and materials for drying hands, are full stocked.

### Recommended Best Practices*

- Players are encouraged to avoid touching their face with their hands.
- Players, coaches, and managers can wear masks as optional equipment during training. Players should not wear masks during strenuous activities.
- Coaches and team managers will pick up gear, and if necessary, disinfect after each session.
- Wash your hands before departing the practice.
- Personal belongings (e.g. cell phones) of players and coaches should be sterilized regularly.
- Use disinfectants outlined on [EPA List N](#).
- Provide hand sanitizer stations.
- If snacks are provided, provide individually packaged snacks.
- Ensure availability of at least 3 weeks of cleaning supplies.
- Keep up with CDC and health-based organizations information regarding COVID-19 in relation to sport activities.
- Coaches and team managers should ensure that players are following COVID-19 related prevention measures included herein.

### During Training

#### Medical Clearance

- Require medical clearances from those that had previously tested positive for COVID-19.
- For individuals who have experienced a known COVID-19 exposure in the past 14 days, home quarantine for 14 days is required. A medical clearance is required to return to practice following the home quarantine.
- Report the onset of any new symptoms immediately. Conduct daily symptom assessments.**
- Players should contact their physician and follow the recommendations, if they have any symptoms.
- Any player feeling unwell should not practice and immediately notify their coach/team manager.
- Any (or their family member) player presenting symptoms of COVID-19 (fever, cough, trouble breathing, etc.) should notify their coach and team manager immediately. All activities should be suspended until testing is complete.
- Any player (or their family member) who tests positive will require all team activities and practices to be canceled for 14 days.

#### Confirmed Cases

- Immediately isolate and seek medical care for any individual who develops symptoms while at work and follow CDC guidelines.
- Contact the local health district about suspected cases or exposures and employers should maintain the confidentiality of employee health information.
- Shutdown any facility for deep cleaning and disinfection, if possible.
- Use disinfectants outlined on [EPA List N](#).

- For individuals with pre-existing medical condition, written clearance from their physician should be provided. The written clearance should note that the player can participate fully, and the activity is recommended.
- Work with local health department to identify potentially infected or exposed individuals to help facilitate effective contact tracing/notifications.
- Once testing is readily available, test all suspected infections or exposures.
- Following testing, contact local health department to initiate appropriate care and tracing.

**Daily symptom assessments should include monitoring for fever, cough, and trouble breathing.
