Comment by: Lindsey Garcia

Dear Task Force,

Please address the following question:

What cycle thresholds are the COVID tests in Nevada being performed at?

Tony Fauci has publicly stated that the PCR COVID test is useless and misleading when the test is run at 35 cycles or higher. This creates a major problem when The FDA recommends the test should be run up to 40 cycles. If the labs in Nevada are performing the test at 35 cycles or higher, then how many people have been given a false positive result? Could a flawed test explain the high number of cases? Is the destruction of lives being based on false case numbers?

Speaking of lives being destroyed, how on Earth can you justify the harm that is being inflicted upon children? Requiring them to be socially isolated and wear oxygen depriving masks is criminal when the CDC's own data states a COVID-19 survival rate of over 99% for ages 0-69 and a 94% survival rate for those over age 70. All schools in Nevada need to be open and operating without these psychologically damaging and needless mandates.

Also, businesses should not be encouraged, through state mandates, to violate our civil and Federal rights by requiring masks. A mask is classified as a medical intervention, which can only be recommended by a licensed physician, and even then, you still have the choice to refuse.
