Please read these comments at Task Force meeting on Thursday November 19 2020

The purpose of a task force must be to seek and find truth relating to the identified task. There has already been so much deception and manipulation in the area of Covid 19 that the resulting repercussions will likely never be justified. The fact that this so called virus has never been scientifically isolated and specifically defined undermines any precaution, testing, and/or potential vaccine. The unanswered question remains how can anyone properly identify, test and defend against, or medically remedy a virus whose specific scientific characteristics remain unknown.

Even the testing currently in place is flawed and produces unreliable results. Far too many false positives are produced since the current magnification used in testing far exceeds the known recommended magnification rate. Furthermore, the current testing methods were never intended to diagnose a virus. The test can not differentiate between a true virus and otherwise normal exosomes that are common within human cells when self-cleansing a variety of toxins or insults within our human bodies.

Please do not continue with solutions that are worse in their effects than the cause itself. Unnecessary lock-downs and meaningless and harmful mask mandates do nothing but steal freedom and the right to choose their own risk and fate. It's not for government officials to dictate control.
