

There was enough scientific consensus to grant a stay to the shut-down orders of outdoor dining in California. Why is Nevada continuing to pursue a policy that is creating more problems than it is solving? We need a CT cut-off of between 33-35 determined and required for all labs, mandatory CT value reporting with all results and education promoted to all providers regarding the implications of this cut-off and related values.

The court case document with several expert witnesses is an enlightening read and sets precedence for limiting the power PCR has in determining economic closures and quarantine of persons.
