**COVID-19 Mitigation and Management Task Force receives an update on vaccination efforts**

CARSON CITY, NV — Today, the Nevada COVID-19 Mitigation and Management Task Force heard presentations by the many partners contributing to vaccination efforts in the state.

The State Immunization Program, Immunize Nevada and members of the Nevada Vaccine Equity Collaborative discussed statewide vaccination efforts and outreach being conducted. A copy of the presentations can be found at [Nevada Health Response's Nevada COVID-19 Task Force](#) page.

Each local health authority presented on their current vaccination efforts, challenges they have seen recently and successes they have had. They all indicated a shift in their focus to smaller, more localized vaccination clinics to meet Nevadans where they are in ways that are more accessible.

Additionally, the State Biostatistician from the Department of Health and Human Services Office of Analytics gave an update on COVID-19 cases, testing, deaths and vaccination efforts. Overall, the indicators have stabilized and are trending in a positive direction. The biostatistician contributed the success in mitigation the impacts of COVID-19 to the growing level of vaccination.

A recording of this and previous COVID-19 Mitigation and Management Task Force meetings can be found on the [NV Health Response YouTube channel](#). More information about the task force can be found in the [Nevada Health Response – COVID-19 Task Force page](#).
