**Nevada Health Response issues recommendations on
Halloween activities**

Carson City, NV — Today, Nevada Health Response issued recommendations and guidance for celebrating Halloween. Celebrating Halloween is a tradition many Nevadans look forward to each year. In light of the COVID-19 Coronavirus Disease, it is important Nevadans do all we can to minimize the risk of catching or spreading the COVID-19 virus while having fun on these special days.

Many traditional Halloween activities, such as door-to-door trick-or-treating, have a lower risk because they take place outdoors or the interactions may be short. As Nevadans plan their Halloween activities, consider and follow these guidelines and best practices.

Vaccination is the leading public health prevention strategy to end the COVID-19 pandemic. Influenza vaccinations are also vital to preventing respiratory disease. Promoting vaccination can help Nevadans safely return to normal activities.

The guidance can be found [here](#).
