GET YOUR SMART HEALTH QR CODE
YOUR COVID-19 DIGITAL VACCINE RECORD

What is a COVID-19 SMART Health QR Code?

Your SMART Health QR Code is a digital vaccine record created from the data stored in Nevada WebIZ, the statewide immunization information system. Your Code holds the same information as your CDC vaccine card: name, date of birth, vaccine date and type. It serves as an official State of Nevada digital record that can only be scanned by a SMART Health verifier app.

How do I get my QR Code?

Go to the Nevada WebIZ Public Access Portal at **https://izrecord.nv.gov** and search for your record. The SMART Health QR Code will be visible at the bottom of your COVID-19 Vaccination Record. Download your record and save your QR Code as a digital file on your phone, computer, or anywhere you store your digital information.

How can I access my QR Code?

Your SMART Health QR Code can be scanned by any SMART Health verified app from your phone or other your electronic device, from an app, or from a paper print out.
