

Ateres Bnos Ita Covid Mitigation Plan

If a Covid outbreak occurs:

- Any student or teacher exposed will require a negative test regardless of whether they are vaccinated or not.
- The School encourages the students and staff to use the services of RESET IV (which is a building over) who provides all types of tests. If a student or staff member wants to go elsewhere, that is fine as long as they report the results from the testing site.
- If a number of students or staff test positive, the class(es) will have to change to remote learning until they do the proper amount of quarantine time (based on the CDC/SNHD guidelines).
- In the situation of an outbreak the School will contact the SNHD(email address of schoolcovid@snhd.org) to report the outbreak.
- In the case of an outbreak if the SNHD advises the school to wear masks the school will implement a mask policy for the foreseeable future.
- The School has encouraged parents and staff to be vaccinated and have their children vaccinated. (All staff are vaccinated.)
- All students are advised to keep regular hygiene which includes washing their hands with soap or using hand sanitizer (which is in each classroom).
- The School is cleaned nightly with the surfaces being sprayed with a disinfectant.
